Preliminary Note

The Message Definition Report (MDR) is made of three parts:

MDR Part 1

This describes the contextual background required to understand the functionality of the proposed message set. Part 1 is produced by the submitting organization that developed or maintained the message set in line with an MDR Part 1 template provided by the ISO 20022 Registration Authority (RA) on www.iso20022.org.

MDR Part 2

This is the detailed description of each message definition of the message set. Part 2 is produced by the RA using the model developed by the submitting organization.

MDR Part 3

This is an extract if the ISO 20022 Business Model describing the business concepts used in the message set. Part 2 is an Excel document produced by the RA.

1 Introduction

1.1 Terms and Definitions

The following terms are reserved words defined in ISO 20022 Edition 2013 – Part1. When used in this document, the UpperCamelCase notation is followed.

Term	Definition
BusinessRole	Functional role played by a business actor in a particular BusinessProcess or BusinessTransaction.
Participant	Involvement of a BusinessRole in a BusinessTransaction.
BusinessProcess	Definition of the business activities undertaken by BusinessRoles within a BusinessArea whereby each BusinessProcess fulfils one type of business activity and whereby a BusinessProcess may include and extend other BusinessProcesses.
BusinessTransaction	Particular solution that meets the communication requirements and the interaction requirements of a particular BusinessProcess and BusinessArea.
MessageDefinition	Formal description of the structure of a message instance.

Note When a MessageDefinition or message identifier is specified, it should include the variant and version number. However, in this document (except in the business examples section, if present), variant and version numbers are not included. In order to know the correct variant and version number for a MessageDefinition, the related Message Definition Report Part 2 document should be consulted.

1.2 Abbreviations and Acronyms

The following is a list of abbreviations and acronyms used in the document.

Abbreviation/Acronyms	Definition
4CB	Banca d'Italia, Banque de France, Deutsche Bundesbank and Banco d'España
ACK	Acknowledgement
ACH	Automated Clearing House
AML	Anti-Money Laundering
BIC	Business Identifier Code
B/D	Broker/Dealer
CA	Corporate Actions
CAG	Corporate Advisory Group
CBI	Corporate Banking Interbancario
CCP	Central Counterparty
CNS	Continuous Net Settlement
CSD	Central Securities Depository
CUG	Closed User Group

Abbreviation/Acronyms	Definition
DD	Direct Debit
EACH	European Association of Central Counterparty Clearing Houses
EnI	Exceptions and Investigations
ESCH	European System of Central Banks
ESCR	Committee of European Securities Regulators
FI	Financial Institution
FIA	Futures Industry Association
FOA	Futures and Options Association
GCM	General Clearing Member
IBAN	International Bank Account Number
ICM	Individual Clearing Member
ICSD	International Central Securities Depository
IDB	Inter-dealer/broker
IFX	Interactive Financial eXchange Forum
ISTH	International Standards Team Harmonisation
ISITC	International Securities Association for Institutional Trade Communication
KYC	Know Your Customer
MCR	Message Change Request
MDR	Message Definition Report
MTF	Multilateral Trading Facility
MRI	Mandate Related Information
NCM	Non-Clearing Member
NAK	Negative acknowledge (reject)
OAGi	Open Application Group
PV	Proxy Voting
RTGS	Real Time Gross Settlement
SBF	Société de Bourse française (now Euronext)
SEG	Standards Evaluation Group
SLA	Service Level Agreement
SMPG	Securities Market Practice Group (www.smpg.info)
TDN	Trade Date Netting
TM	Trading Member
TSU	Trade Services Utility
TWIST	Transaction Workflow Innovation Standards Team
XML	eXtensible Mark-up Language

1.3 Document Scope and Objectives

This document is the first part of the Static Data Audit Trail Message Definition Report (MDR) that describes the BusinessTransactions and underlying message set. For the sake of completeness, the

document may also describe BusinessActivities that are not in the scope of the business processes covered in this document.

This document describes the following:

- the BusinessProcess scope
- the BusinessRoles involved in these BusinessProcesses

The main objectives of this document are as follows:

- to provide information about the messages that support the business processes
- to explain the BusinessProcesses and BusinessActivities these messages have addressed
- to give a high level description of BusinessProcesses and the associated BusinessRoles
- to document the BusinessTransactions
- to provide business examples

The messages definitions are specified in Message Definition Report Part 2.

2 Scope and Functionality

2.1 Background

This Message Definition Report covers a set of 5 messages MessageDefinitions developed by Banca d'Italia on behalf of 4CB in close collaboration with SWIFT and approved by the Securities Standards Evaluation Group (SEG) on 18 June 2026. These messages are specifically designed to support Cash Account Queries and Reports.

2.2 Scope

As described in the ISO 20022 Business Justification, the scope covers the communication flows described below.

2.3 Groups of MessageDefinitions and Functionality

Note These messages are to be used with the ISO 20022 Business Application Header (head.001). The schema and more information about the Business Application Header (BAH) can be found on the www.iso20022.org web site

2.3.1 Groups

2.3.1.1 Cash Account Query and report

The message set includes all the message definition to provide with query, report, statement and audit trail for cash accounts:

MessageDefinition	Message Identifier
AccountQueryList	acmt.025
AccountListReport	acmt.026
CashAccountActivityAdvice	reda.038
CashAccountAuditTrailQuery	reda.039
CashAccountAditTrailReport	reda.040

2.3.2 Functionality

These Cash Account Query and Report messages definitions are specifically designed to support the following technical functions:

- **Account Query List**: the acmt.025 is sent to make the following types of queries:
  - Cash Account Reference Data Query enabling the sender to request the detailed reference data of a cash account;
  - Cash Account List Query enabling the sender to request a list of cash accounts ;
  - Settlement Bank Account Group Query enabling the sender to request details of Settlement Bank Account groups.

- **Account List Report**: the acmt.026 is sent to provide with a list of accounts with the following features:
  - Detailed reference data information;

  - Cash account identifiers;
  - Settlement bank account groups identification and composition;
  - The AccountListReport message is sent as response to the AccountQueryList acmt.025 message, containing information on requested items (cash accounts or settlement bank account groups) or business error reports.

- **Cash Account Activity Advice**: the reda.038 is sent to provide with a list of detailed information on:
  - Creation of new cash accounts
  - Modification of already existing cash accounts
  - Deletion of already existing cash accounts;
  - The CashAccountActivityAdvice is sent in push mode to the subscribing parties. Elements in the activity advice vary depending on the requestor scope.

- **Cash Account Audit Trail Query**: the reda.039 is sent to make the following types of queries:
  - Detailed audit trail information on cash accounts over a period of time;
  -
- **Cash Account Audit Trail Report**: the reda.040 is sent to provide with the following detailed information:
  - Creation of new cash accounts
  - Modification of already existing cash accounts
  - Deletion of already existitng cash accounts
  - The CashAccountAuditTrailReport message is sent as response to the CashAccountAuditTrailQuery reda.039 message, containing information on requested items or business error reports.

See Message Definition Report Part 2 for the message and formats.

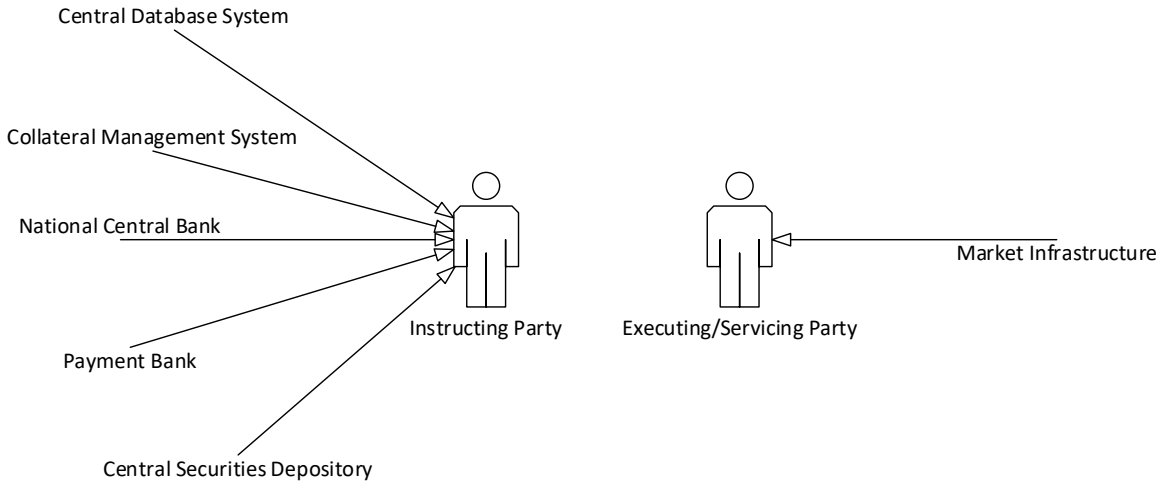

3 BusinessRoles and Participants

A BusinessRole represents an entity (or a class of entities) of the real world, physical or legal, a person, a group of persons, a corporation. Examples of BusinessRoles: “Financial Institution”, “Automated Clearing House”, “Central Securities Depository”.

A Participant is a functional role performed by a BusinessRole in a particular BusinessProcess or BusinessTransaction. Examples of Participants: the “user” of a system, “debtor”, “creditor”, “investor”.

The relationship between BusinessRoles and Participants is many-to-many. One BusinessRole can be involved as different Participants at different moments in time or at the same time. Examples of BusinessRoles: "user", "debtor”, "creditor", "investor". Different BusinessRoles can be involved as the same Participant.

In the context of Cash Account Query and Reports the high-level BusinessRoles and typical Participants can be represented as follows:

-

3.1 Participants and BusinessRoles Definitions

Participants

Description	Definition
Instructing Party	Party that instructs the executing/servicing party to process and monitor a transaction.
Executing / Servicing Party	Party that processes, monitors and reports on transactions received from the Instructing party.

Business Roles

Description	Definition
Collateral Management System	System focused on management of eligible collateral used for credit operations.

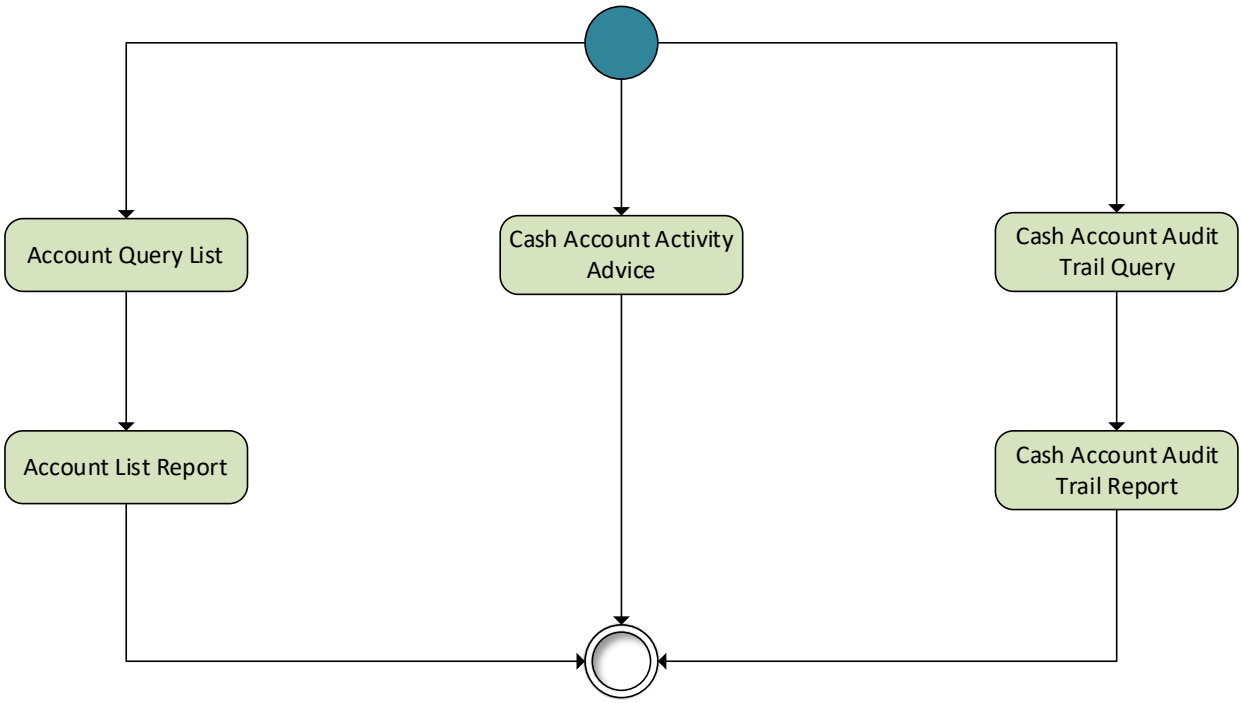

Description	Definition
National Central Bank	The principal monetary authority of a nation, a central bank performs several key functions, including issuing currency and regulating the supply of credit in the economy.
Payment Bank	A Payment Bank is either a central bank or a private bank used to settle the cash leg of securities settlements: it provides the cash account to support the settlement of the securities transactions of another financial institution in central bank money (CeBM).
Central Database System	System collecting data from different sources and providing them to other systems.
Central Securities Depository (CSD)	An infrastructure that, holds or controls, the holding of physical or dematerialised financial instruments belonging to all, or a large portion of, the investors in a securities market. This affects the centralised transfer of ownership of such securities by entries on its books and records.
Market Infrastructure	The party that provides, through common membership, services to create a fair and open process for the execution of transactions between trading parties, and the creation of settlement obligations. Example include an exchange.

3.2 BusinessRoles and Participants Table

BusinessRole	Participant Account Servicer	Participant Account Owner
Collateral Management System	X	
National Central Bank	X	
Payment Bank	X	
Central Security Depository (CSD)	X	
Market Infrastructure		X

4 BusinessProcess Description

This diagram represents the high level BusinessProcesses.

Account Query List

Item	Description
Definition	The Instructing Party asks the Executing/Servicing Party a response to a query.
Trigger	The process is triggered when the Instructing Party sends an Account Query List message.
Pre-conditions	The query type must be known by the Instructing party and the Executing/Servicing Party.
Post-conditions	The Account List Report message including all of the retrieved Cash Account records.
Role	Instructing Party.

Cash Account Audit Trail Query

Item	Description
Definition	The Instructing Party asks the Executing/Servicing Party a response to a query.
Trigger	The process is triggered when the Instructing Party sends a Cash Account Audit Trail Query message.
Pre-conditions	The query type must be known by the Instructing party and the Executing/Servicing Party.

Item	Description
Post-conditions	The Cash Account Audit Trail Report message including all of the retrieved Cash Account Audit Trail records.
Role	Instructing Party.

Cash Account Activity Advice

Item	Description
Definition	The Recipient Party receives a Cash Account Activity Advice statement which has been automatically produced by the Executing/Servicing Party.
Trigger	The process is triggered automatically.
Pre-conditions	A standing instruction is in place at the Executing/Servicing Party for sending of the statement.
Post-conditions	The acknowledgement of the sending of the statement.
Role	Executing/Servicing Party.

5 Description of BusinessActivities

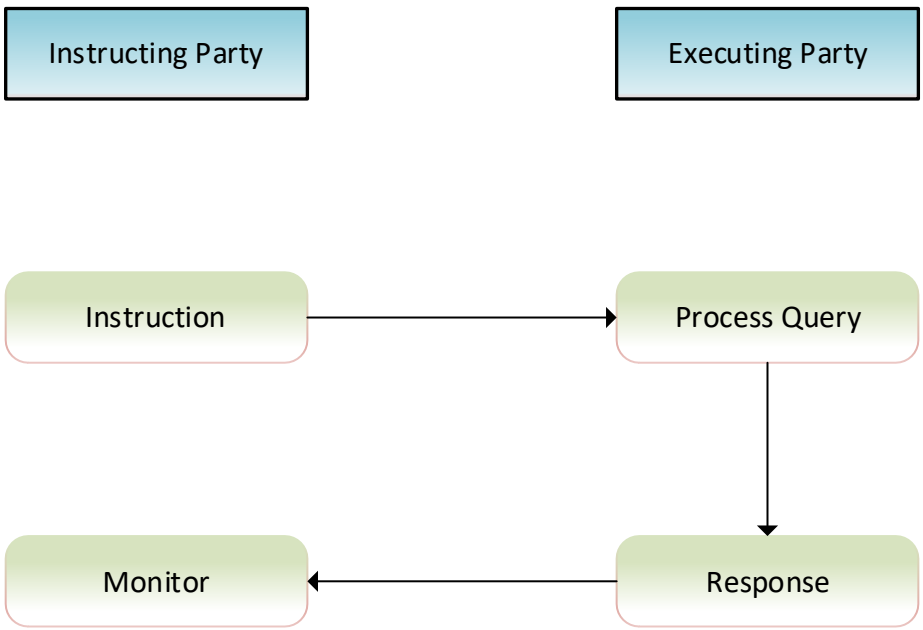

This section presents the different BusinessActivities within each BusinessProcess. The BusinessActivities of a process are described with activity diagrams.

Legend

Symbol	Name	Definition
●	Start Point	Shows where the lifecycle of the business process commences.
◉	End Point	Shows where the lifecycle of the business process may ends.
◇	Lozenge (or diamond)	Indicates that a choice between several actions can be made.
▬	Bar	Indicates that several actions are initiated in parallel.

5.1 Cash Account Query and Report

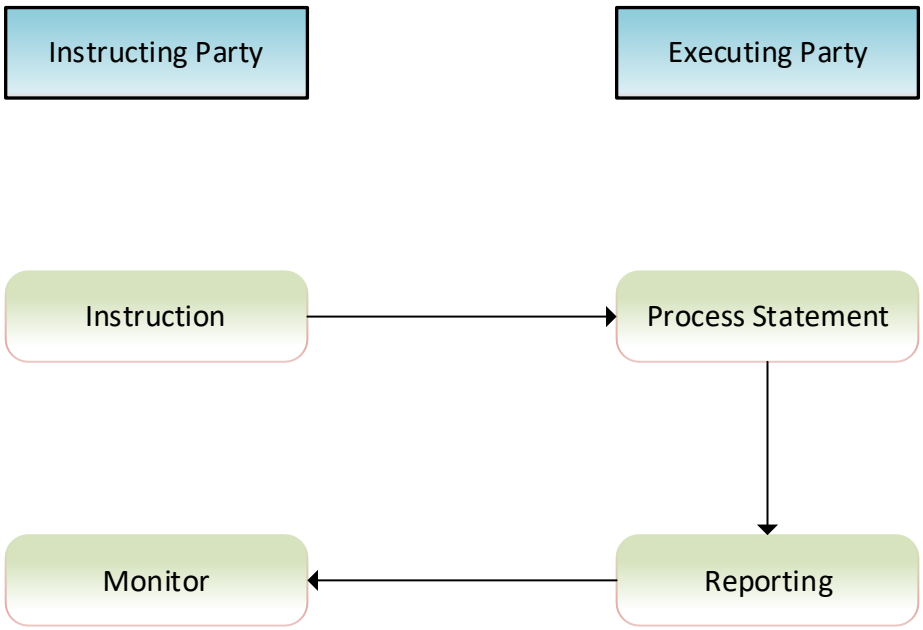

5.1.1 Account Query List - Account List Response process

Step	Description	Initiator
Instruction	Instructing Party instructs Executing/Servicing Party to run an Account query.	Instructing Party

Step	Description	Initiator
Process Query	Executing/Servicing Party processes the request. In case the processing of the query takes too much time or cannot give any positive response, the Executing/Servicing Party sends an error message back to the Instructing Party with the error code and the related explanation.	Executing/Servicing Party
Response	Executing/Servicing Party sends the response to the Instructing Party according to query results.	Executing/Servicing Party
Monitor	Instructing Party monitors the status of the instruction	Instructing Party

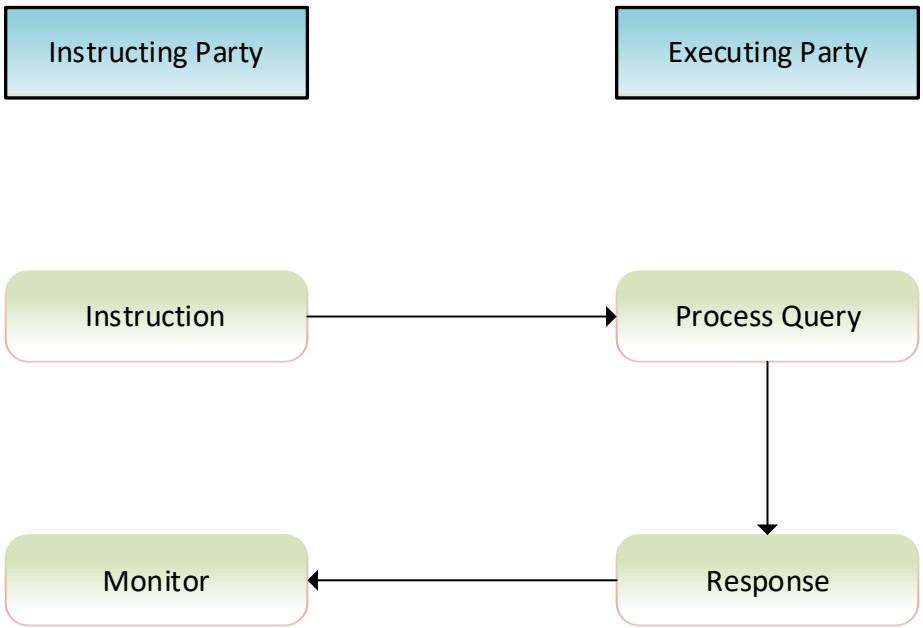

5.1.2 Cash Account Activity Advice process

Step	Description	Initiator
Instruction	Instructing Party might instruct Executing/Servicing Party to run a statement. This is not covered by the current process as NO message will be created to cover this.	Instructing Party

Step	Description	Initiator
Process Statement	Executing/Servicing Party processes the statement.	Executing/Servicing Party
Reporting	Executing/Servicing Party sends the statement to the Instructing Party.	Executing/Servicing Party
Monitor	Instructing Party monitors the status of the instruction	Instructing Party

5.1.3 Cash Account Audit Trail Query/Response process

Step	Description	Initiator
Instruction	Instructing Party instructs Executing/Servicing Party to run a Cash Account Audit Trail query.	Instructing Party
Process Query	Executing/Servicing Party processes the request. In case the processing of the query takes too much time or cannot give any positive response, the Executing/Servicing Party sends an error message back to the Instructing Party with the error code and the related explanation.	Executing/Servicing Party
Response	Executing/Servicing Party sends the response to the Instructing Party according to query results.	Executing/Servicing Party

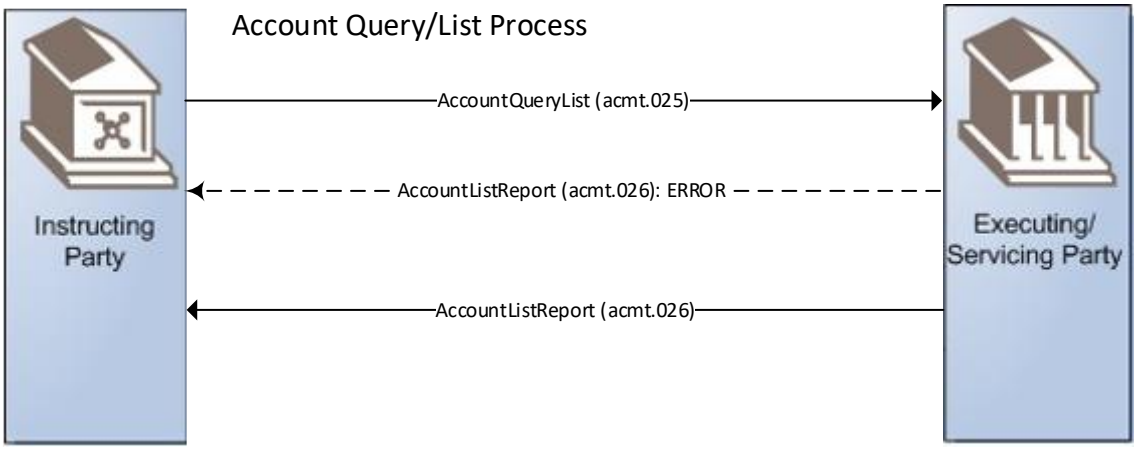

Step	Description	Initiator
Monitor	Instructing Party monitors the status of the instruction	Instructing Party

6 BusinessTransactions

This section describes the message flows based on the activity diagrams documented above. It shows the typical exchanges of information in the context of a BusinessTransaction.

6.1 Query/Response Process

6.1.1 Account Query List/Report Scenario

Account Query List

The Instructing Party sends an instruction to the Executing/Servicing Party to run a query according to specified criteria.

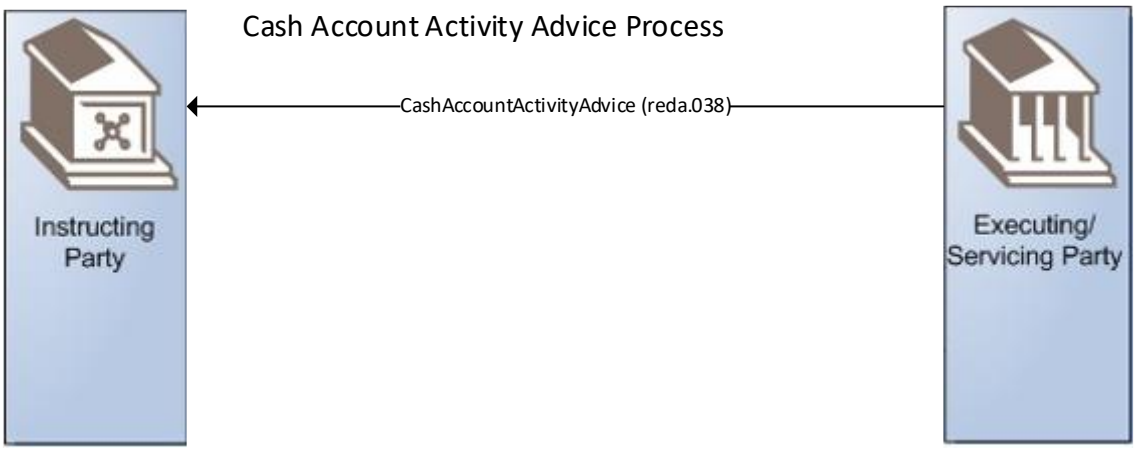

Account List Report - Negative Scenario

Depending on the query criteria, it is possible that the processing will take more than a certain time or that the result of the query will be empty due to wrong combination of criteria or no result set. In this case, an error message within a query response message is sent to the Instructing Party.

Account List Report

The Executing/Servicing Party sends a query response that meets the specified criteria to the Instructing Party.

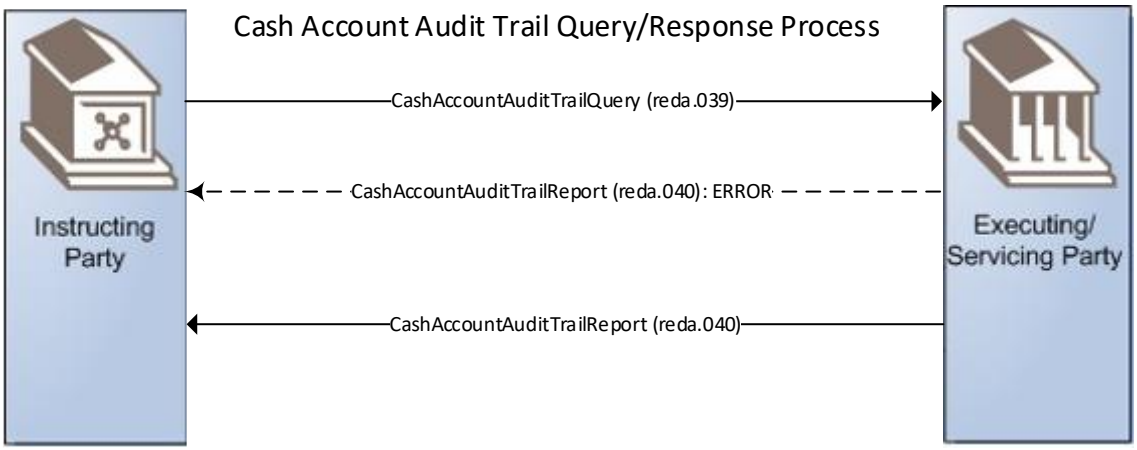

6.1.2 Cash Account Activity Advice Process

Cash Account Activity Advice

The Executing/Servicing Party sends a statement to the Instructing Party containing information on changes occurred for Cash Account reference data during the business day.
The statement is sent unilaterally in an unsolicited manner.

6.1.3 Cash Account Audit Trail Query/ Report Scenario

Cash Account Audit Trail Query

The Instructing Party sends an instruction to the Executing/Servicing Party to run a query according to specified criteria's to retrieve the complete audit trail on a specific cash account.

Cash Account Audit Trail Report - Negative scenario

Depending on the query criteria, it is possible that the processing will take more than a certain time or that the result of the query will be empty due to wrong combination of criteria or no result set. In this case, an error message within a query response message is sent to the Instructing Party.

Cash Account Audit Trail Report

The Executing/Servicing Party sends a query response that meets the specified criteria to the Instructing Party.

7 Business Examples

This section describes business examples of the use of the various candidate MessageDefinitions.

7.1 Account Query List/Report

7.1.1 acmt.025.001.02 AccountQueryList

Description

An AccountQueryList message is sent to an account servicer, by an institution requesting information on already existing accounts.
