ISO 20022

Target2-Securities - Intra-Balance - Maintenance 2023 - 2024

Message Definition Report Part 1

Approved by the Securities and Payments SEG under the leadership of the Securities SEG on 15 February 2024

This document provides information about the use of the candidate messages for Target2-Securities - Intra-Balance and includes, for example, business scenarios and messages flows.

March 2024

7.12 Intra-balance Movement Cancellation Query - camt.082.001 66
7.13 Intra-balance Movement Cancellation Report - camt.083.001 67
7.14 Intra-balance Movement Posting Report - camt.084.001 69
7.15 Intra-balance Movement Pending Report - camt.085.001 74

8 Revision Record 82

Preliminary Note

The Message Definition Report (MDR) is made of three parts:

MDR Part 1

This describes the contextual background required to understand the functionality of the proposed message set. Part 1 is produced by the submitting organization that developed or maintained the message set in line with an MDR Part 1 template provided by the ISO 20022 Registration Authority (RA) on www.iso20022.org.

MDR Part 2

This is the detailed description of each message definition of the message set. Part 2 is produced by the RA using the model developed by the submitting organization.

MDR Part 3

This is an extract if the ISO 20022 Business Model describing the business concepts used in the message set. Part 2 is an Excel document produced by the RA.

1 Introduction

1.1 Terms and Definitions

The following terms are reserved words defined in ISO 20022 Edition 2013 – Part1. When used in this document, the UpperCamelCase notation is followed.

Term	Definition
BusinessRole	Functional role played by a business actor in a particular *BusinessProcess* or *BusinessTransaction.*
Participant	Involvement of a *BusinessRole* in a *BusinessTransaction.*
BusinessProcess	Definition of the business activities undertaken by *BusinessRoles* within a *BusinessArea* whereby each *BusinessProcess* fulfils one type of business activity and whereby a *BusinessProcess* may include and extend other *BusinessProcesses.*
BusinessTransaction	Particular solution that meets the communication requirements and the interaction requirements of a particular *BusinessProcess* and *BusinessArea.*
MessageDefinition	Formal description of the structure of a message instance.

Note When a MessageDefinition or message identifier is specified, it should include the variant and version number. However, in this document (except in the business examples section, if present), variant and version numbers are not included. In order to know the correct variant and version number for a MessageDefinition, the related Message Definition Report Part 2 document should be consulted.

1.2 Abbreviations and Acronyms

The following is a list of abbreviations and acronyms used in the document.

Abbreviation/Acronyms	Definition
4CB	Banca d'Italia, Banque de France, Deutsche Bundesbank and Banco d'España
ACH	Automated Clearing House
A2A	Application-to-Application mode. Defines a mode of technical communication that permits the exchange of information between software applications of T2S and a directly connected T2S actor.
BAH/head.001	Business Application Header
BIC	Business Identifier Code
CeBM	Central Bank Money
CSD	Central Securities Depository
ID	Identification
MDR	Message Definition Report
NCB	National Central Bank
RTGS	Real-time gross settlement (RTGS) system. A settlement system in which processing and settlement take place in real-time on a gross basis.
SEG	Standards Evaluation Group
T2S	TARGET2-Securities

Abbreviation/Acronyms	Definition
TM	Technical Message. Messages which cover technical functions within T2S System
U2A	User-to-Application mode. Defines a mode of technical communication that permits the exchange of information between software applications of T2S and a T2S system user through a graphical user interface (GUI).
URD	T2S User Requirement Document
XML	eXtensible Mark-up language

1.3 Document Scope and Objectives

This document is the first part of the Target2-Securities - Party Reference Data Message Definition Report (MDR) that describes the BusinessTransactions and underlying message set. For the sake of completeness, the document may also describe BusinessActivities that are not in the scope of the business processes covered in this document.

This document describes the following:

- the BusinessProcess scope
- the BusinessRoles involved in these BusinessProcesses

The main objectives of this document are as follows:

- to provide information about the messages that support the business processes
- to explain the BusinessProcesses and BusinessActivities these messages have addressed
- to give a high-level description of BusinessProcesses and the associated BusinessRoles
- to document the BusinessTransactions
- to provide business examples

The messages definitions are specified in Message Definition Report Part 2.

2 Scope and Functionality

2.1 Background

This Message Definition Report covers a set of fifteen candidate Intra-balance Movement ISO 20022 MessageDefinitions developed by Deutsche Bundesbank on behalf of 4CB in close collaboration with SWIFT and approved by the Securities and Payments SEG under the leadership of the Securities Standards Evaluation Group (SEG) on 15 February 2024.

Originally, the messages have been designed to support the T2S community for Collateral management. T2S (TARGET2-Securities) is a European securities settlement engine which offers centralised settlement in central bank money across all European securities markets. The fundamental objective of T2S is to integrate and harmonise the highly fragmented securities settlement infrastructure in Europe. It aims to reduce the costs of cross-border securities settlement and increase competition and choice among providers of post-trading services in Europe.

2.2 Scope

The Intra-balance Message set is specifically designed to support the management of the Intra-balance movements that provide parties with the ability to allocate money for a specific purpose. In T2S, an allocation of money prevents the transfer of a specific currency from a specific T2S Dedicated Cash Account. When an intra balance movement instruction is submitted for settlement, and if a sufficient amount of money is available on the relevant accounts, T2S allocates the amount of money specified in the intra balance movement instruction on the T2S DCA(s). If an insufficient amount of money is available, the allocation takes place only for the limited amount of money effectively available. Additionally, this message set also supports the modification and cancellation of the Intra-balance movements prior to its execution, the monitoring of the execution of the Intra-balance movement instructions and the activity reporting.

2.3 Groups of MessageDefinitions and Functionality

Note These messages are to be used with the ISO 20022 Business Application Header (head.001). The schema and more information about the Business Application Header (BAH) can be found on the www.iso20022.org web site

2.3.1 Groups

This Intra-balance movement message set consists of:

MessageDefinition	Message Identifier
Intra-balance Movement Instruction	camt.066
Intra-balance Movement Status Advice	camt.067
Intra-balance Movement Confirmation	camt.068
Intra-balance Movement Modification Request	camt.072
Intra-balance Movement Modification Request Status Advice	camt.073
Intra-balance Movement Cancellation Request	camt.074
Intra-balance Movement Cancellation Request Status Advice	camt.075
Intra-balance Movement Query	camt.078
Intra-balance Movement Query Response	camt.079

MessageDefinition	Message Identifier
Intra-balance Movement Modification Query	camt.080
Intra-balance Movement Modification Report	camt.081
Intra-balance Movement Cancellation Query	camt.082
Intra-balance Movement Cancellation Report	camt.083
Intra-balance Movement Posting Report	camt.084
Intra-balance Movement Pending Report	camt.085
Intra-balance Movement Instruction	camt.066
Intra-balance Movement Status Advice	camt.067
Intra-balance Movement Confirmation	camt.068

The Intra-balance Movement message definitions are specifically designed to support the following technical functions:

2.3.1.1 Instruction related messages

Intra-balance Movement Instruction (camt.066) provides a user, granted with the appropriate rights, with the possibility to allocate cash sub-balances. It can also be used to increase or decrease the cash in an existing restricted cash sub-balance.

The user has to specify an identification to uniquely and unambiguously identify the message, an identification of the cash account to or from which an entry is made and the identification of its owner, and also the details of the movement of cash between balances.

The Intra-balance Movement Status Advice (camt.067) informs the Instructing Party about the status of its Intra-balance Movement Instruction.

The Intra-balance Movement Confirmation (camt.068) is used to confirm the successful processing of an Intra-balance Movement Instruction.

2.3.1.2 Modification related messages

Intra-balance Movement Modification Request (camt.072) provides a user, granted with the appropriate rights, with the possibility to amend processing indicators, for instance the priority or linkages, of an existing Intra-balance Movement Instruction.

The user must specify an identification to uniquely and unambiguously identify the message, an identification of the cash account to or from which an entry is made and the identification of its owner, and also the details of the modification requested.

The Intra-balance Movement Modification Request Status Advice (camt.073) informs the Instructing Party about the status of its Intra-balance Movement Modification Request.

2.3.1.3 Cancellation related messages

Intra-balance Movement Cancellation Request (camt.074) provides a user, granted with the appropriate rights, with the possibility to cancel an Intra-balance Movement Instruction previously sent which has not been fully settled.

The user must specify an identification to identify uniquely and unambiguously the message, an identification of the cash account to or from which an entry is made and the identification of its owner, and the details of the Intra-balance Movement Instruction to be cancelled.

The Intra-balance Movement Cancellation Request Status Advice (camt.075) informs the Instructing Party about the status of its Intra-balance Movement Cancellation Request.

2.3.1.4 Query related messages

Intra-balance Movement Query (camt.078) provides a user, granted with the appropriate rights, with the possibility to query previously sent Intra-balance Movements based on a criteria of business attributes.

The user must specify an identification to uniquely and unambiguously identify the message, and the criteria to perform the query.

The Intra-balance Movement Query Response (camt.079) provides the corresponding reply based on the business search criteria.

Intra-balance Movement Modification Query (camt.080) provides a user, granted with the appropriate rights, with the possibility to query either full details or the current status of Intra-balance Modification Instructions based on a set of business attributes.

The user has to specify an identification to uniquely and unambiguously identify the message, and the criteria to perform the query.

The Intra-balance Movement Modification Report (camt.081) provides the information of those Intra-balance Modification Instructions that fulfilled the criteria specified previously on the Query Message.

Intra-balance Movement Cancellation Query (camt.082) provides a user, granted with the appropriate rights, with the possibility to query either full details or the current status of Intra-balance Cancellation Instructions based on a set of business attributes.

The user has to specify an identification to uniquely and unambiguously identify the message, and the criteria to perform the query.

The Intra-balance Movement Cancellation Report (camt.083) provides the information of those Intra-balance Cancellation Instructions that fulfilled the criteria specified previously on the Query Message.

2.3.1.5 Reporting related messages

Intra-balance Movement Posting Report (camt.084) is sent to the Instructing Party and provides details of increases and decreases in cash balances settled for a given period of time.

The Intra-balance Movement Posting Report is capable of reporting the details of the Intra-balance movements settled within a cash account for a given period of time grouped by balance type.

Intra-balance Movement Pending Report (camt.085) is sent to the Instructing Party and provides details of pending increases and decreases in cash balances for a given period of time.

The Intra-balance Movement Pending Report is capable of reporting the details of the Intra-balance movements which remain pending within a cash account for a given period of time grouped by balance type.

See Message Definition Report Part 2 for the message and formats.

3 BusinessRoles and Participants

A BusinessRole represents an entity (or a class of entities) of the real world, physical or legal, a person, a group of persons, a corporation. Examples of BusinessRoles: “Financial Institution”, “Automated Clearing House”, “Central Securities Depository”.

A Participant is a functional role performed by a BusinessRole in a particular BusinessProcess or BusinessTransaction. Examples of Participants: the “user” of a system, “debtor”, “creditor”, “investor”.

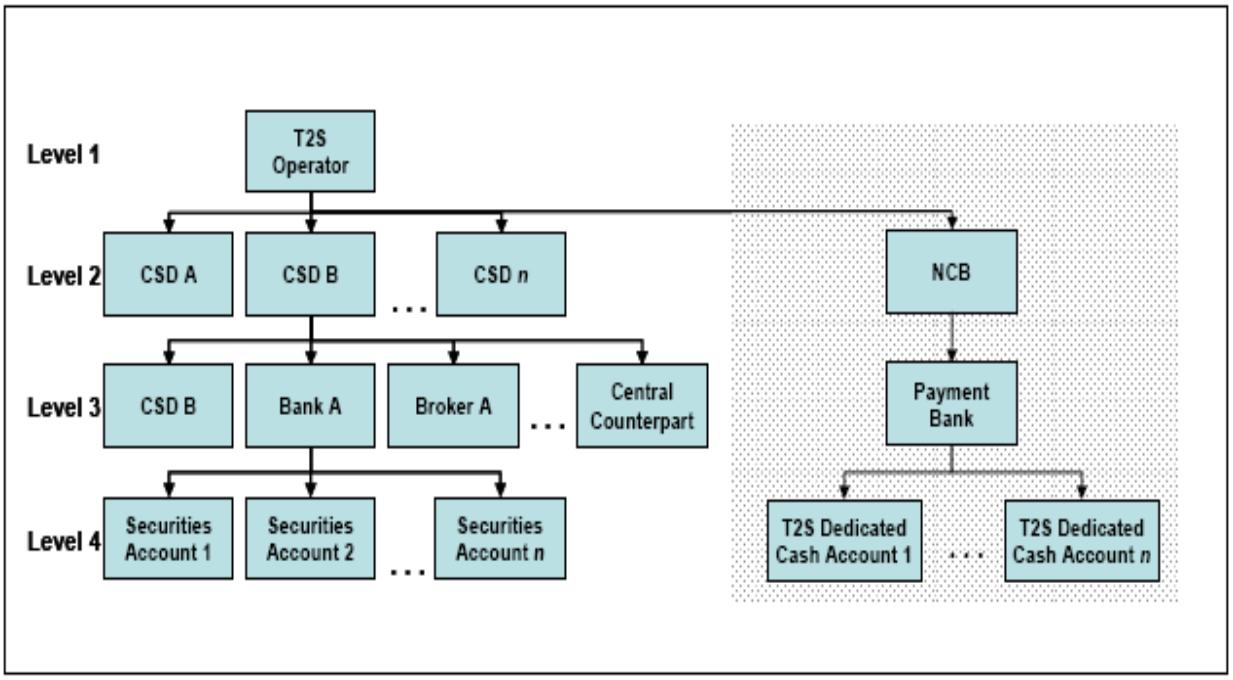

The relationship between BusinessRoles and Participants is many-to-many. One BusinessRole can be involved as different Participants at different moments in time or at the same time. Examples of BusinessRoles: "user", "debtor”, "creditor", "investor". Different BusinessRoles can be involved as the same Participant.

A business actor represents an entity (or a class of entities) of the real world, physical or legal, a person, a group of persons, a corporation. E.g. of business actors: “Financial Institution”, “ACH”, “CSD”, NCB.

A business role is a role performed by a business actor in a specific business context and process: e.g. the “user” of a system, “debtor”, “creditor”, “investor” etc.

Relationship between business roles and actors is many-to-many. One business actor (i.e. a person) can play different roles at different moments in time or at the same time: "user", "debtor, "creditor", "investor" etc. One role can also be played by different actors.

In the context of Collateral Reporting, the high-level business roles and typical actors can be represented as follows, based on the hierarchy of Roles defined in T2S as a securities settlement engine:

T2S supports a hierarchical model of roles and access rights to ensure the segregation of both functions and data. The area of the slide shaded in grey represents the data set-up for T2S dedicated cash accounts required in the static data of T2S. An NCB, acting as a CSD in its home country and providing dedicated cash accounts in T2S, will have the role of NCB and CSD and will exist in T2S as both a CSD and an NCB.

3.1 Participants and BusinessRoles Definitions

Participants

Description	Definition
System Transaction Administrator	In a central system, the entity or neutral body, in charge of providing services to the system's members. It is in charge of performing specified tasks on behalf and under the responsibility of the system's direct members. It can be a matching engine, a settlement engine, or a financial institution. It also maintains accounts or netting balances for the direct members of the system, registers transactions, performs checks and validations, and manages the settlement cycle or other value added processes, as specified in the functional specifications of the system.
System Member	The party that is entitled to make full or partial use of the system transaction administrator, to make it perform business processes on its behalf. A member can submit transactions, and request and/or receive information. A member can be a direct or indirect member.

Business Roles

Description	Definition
Instructing Party	Party that instructs the executing/servicing party to process and monitor a transaction.
Executing/Servicing Party	Party that processes, monitors and reports on transactions received from an instructing party.
Settlement Infrastructure	The party that provides services to its members for the settlement of transactions and holding of assets (e. g. T2S, RTGS).
Central Counterparty	An infrastructure that is very often a component of a clearinghouse and facilitates clearing and settlement for its members by standing between the buyer and the seller of a trade. It may net transactions and substitutes itself as settlement counterparty to each position.
Central Securities Depositories	An infrastructure that, holds or controls, the holding of physical or dematerialised financial instruments belonging to all, or a large portion of, the investors in a securities market. This effects the centralised transfer of ownership of such securities by entries on its books and records.
Stock Exchange	A market in which securities, commodities, options or futures are traded.
T2S operator	The T2S operator is the top level of the hierarchical role and access rights model. The T2S operator role classification includes all T2S system users of the entity, which will be responsible for the day-to-day operation and management of T2S. The T2S actors managed by this entity shall be CSDs and

Description	Definition
	NCBs participating in T2S. At the highest level, the T2S operator shall have access to all data and functionality in the subordinate level.
Settlement Infrastructure Direct Participant	The party which is not a CSD and that is directly connected to the Settlement Infrastructure Platform. It could be a local custodian, a global custodian, a stock exchange, a central counterparty…
Executing / Servicing Party	Party that processes, monitors and reports on transactions received from the Instructing party.
Central Securities Depositories (CSD)	An infrastructure that, holds or controls, the holding of physical or dematerialised financial instruments belonging to all, or a large portion of, the investors in a securities market. This affects the centralised transfer of ownership of such securities by entries on its books and records.
National Central Bank (NCB)	The principal monetary authority of a nation, a central bank performs several key functions, including issuing currency and regulating the supply of credit in the economy.
System Member	The party that is entitled to make full or partial use of the system transaction administrator, to make it perform business processes on its behalf. A member can submit transactions, and request and/or receive information. A member can be a direct or indirect member.
Payment Bank	The payment bank role includes all T2S system users of payment banks that require access to the T2S dedicated cash account balances and postings of the T2S dedicated cash accounts they provide for the purpose of securities settlement.

3.2 BusinessRoles and Participants Table

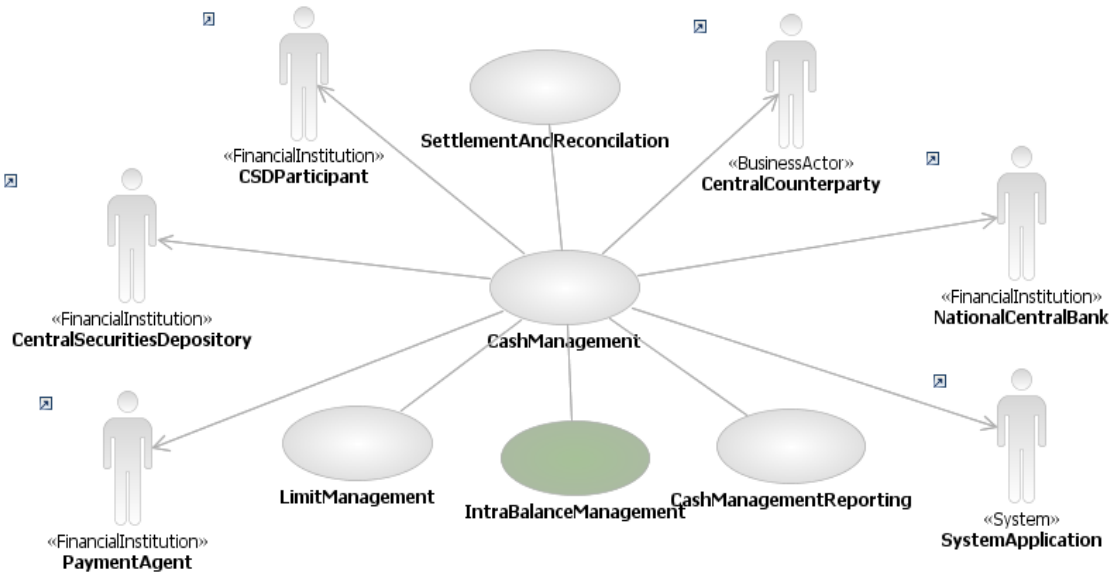

BusinessRole	System Member	System Transaction Administrator
T2S operator	x	
National Central Bank	x	
Payment Bank	x	
Settlement Infrastructure		X
Stock Exchange	X	
Central Counterparty	X	
Central Securities Depository	X	x
Settlement Infrastructure Direct Participant	X	
Instructing Party	X	
Executing/Servicing Party	X	X

4 BusinessProcess Description

4.1 Intra-Balance Management

The following diagram shows the high level business processes covered by the T2S project.

However the Intra-Balance Movement messages only cover the Intra-Balance Management process in green. The other processes are included for completeness.

Movement Process

Item	Description
Definition	The process of enabling the movement of liquidity between sub-balances within the holdings of an account owner in order to proceed with a liquidity restriction.
Trigger	The process is triggered by an instructing party decision or a market infrastructure generated instruction resulting in an intra-balance movement.
Pre-conditions	Existence of sub-balances on a cash account held within a market infrastructure.
Post-conditions	A valid liquidity restriction is generated.
Role	Instructing party for the movement instruction. Executing/Servicing Party for the receipt of the movement instruction.

Status Advice Process

Item	Description
Definition	The process of informing the current status of a liquidity restriction instruction.
Trigger	The process is triggered by market infrastructure when the status changes.
Pre-conditions	Existence of a liquidity restriction in a market infrastructure.
Post-conditions	A status change is generated.
Role	Account owner (Instructing Party) for the receipt of the Status Advice. Executing/Servicing Party for the sending of the Status Advice.

Confirmation Process

Item	Description
Definition	The process of informing that a liquidity restriction instruction has been successfully settled.
Trigger	The process is triggered by a market infrastructure when the liquidity restriction is settled.
Pre-conditions	Restriction on a cash account held within a market infrastructure.
Post-conditions	A confirmation settled is generated.
Role	Account owner (Instructing Party) for the receipt of the Confirmation. Executing/Servicing Party for the sending of the Confirmation.

Modification Process

Item	Description
Definition	The process to request the modification of process indicators or other information as concerns a previously sent intra-balance movement instruction.
Trigger	The process is triggered by an instructing party decision to alter an intra-balance movement instruction.
Pre-conditions	Existence of a liquidity restriction instruction.
Post-conditions	A valid liquidity restriction modification request is generated.
Role	Instructing Party - for the modification request. Executing/Servicing Party - for the receipt of the modification request.

Cancellation Process

Item	Description
Definition	The process to request the cancellation of an intra-balance movement instruction.
Trigger	The process is triggered by an instructing party decision to cancel an intra-balance movement instruction.

Item	Description
Pre-conditions	Existence of a liquidity restriction instruction.
Post-conditions	A valid liquidity restriction cancellation request is generated.
Role	Instructing Party - for the cancellation request. Executing/Servicing Party - for the receipt of the cancellation request.

Modification/Cancellation Status Advice Process

Item	Description
Definition	The process of informing the current status of a liquidity restriction modification or cancellation request.
Trigger	The process is triggered by market infrastructure when the status changes.
Pre-conditions	Existence of a liquidity restriction modification or cancellation request as received within a market infrastructure.
Post-conditions	A status change is generated.
Role	Account owner (Instructing party) - for the receipt of the Status Advice. Executing/Servicing Party - for the sending of the Status Advice.

Movement Querying Process

Item	Description
Definition	The process of enabling the reconciliation of cash movements through the querying of available and necessary data using defined selection criteria.
Trigger	The process is triggered by reconciliation processing (e.g. missing instructions or system errors) resulting in the sending of a query request by the Instructing Party.
Pre-conditions	Instructing Party must hold necessary privileges within the Static Data configuration.
Post-conditions	None.
Role	Instructing Party for the Query.

Movement Reporting Process

Item	Description
Definition	The process of responding, to a received cash movement query.
Trigger	The process is triggered by a system event (e.g. end-of-day or end of night-time cycle…).
Pre-conditions	Receipt of an incoming query.
Post-conditions	A valid Intra-Balance Movement Query Response is generated containing either a business report or operational error.
Role	Executing/Servicing Party for the response.

Modification/Cancellation Query and Report Process

Item	Description
Definition	The Instructing Party asks the Servicing Party a response to a query concerning a previously sent intra-balance movement cancellation instruction/modification.
Trigger	The process is triggered either by the system at the end-of-date event or by the receipt of a query request.
Pre-conditions	Existence of an intra-balance cancellation instruction/modification.
Post-conditions	The acknowledgement of the processing of the query and the generation of a valid intra-balance movement cancellation/modification report.
Role	Account owner (Instructing Party) for the Query. Executing/Servicing Party for the Report.

Pending Reporting Process

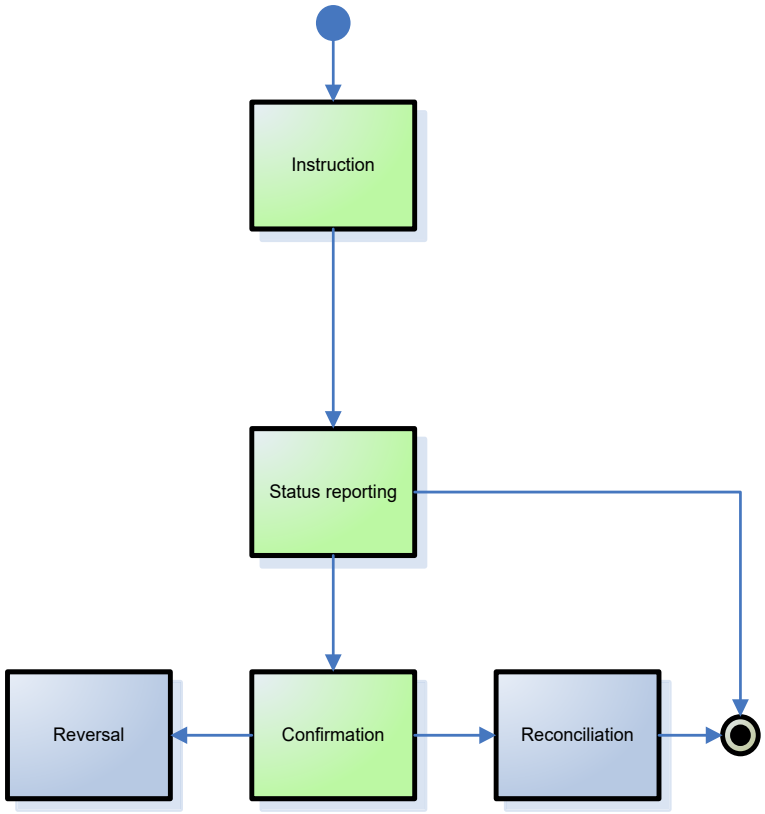

Item	Description
Definition	The process of reporting, for a given period of time, previously sent intra-balance movement instructions with a status of pending.
Trigger	The process is triggered by a system event (e.g. end-of-day or end of night-time cycle…).
Pre-conditions	Static Data configuration satisfying the requirement for reporting of pending intra-balance movement instructions.
Post-conditions	A valid Intra-Balance Movement Pending report is generated.
Role	Executing/Servicing Party for the report / Account owner (Receiving Party) of instructions reported by the report.

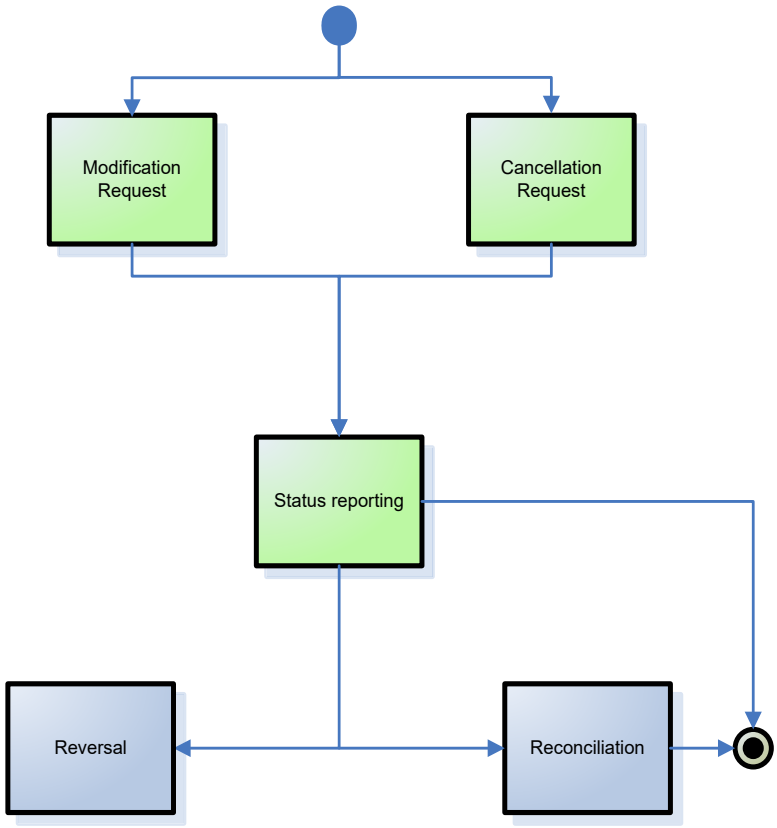

Posting Reporting Process

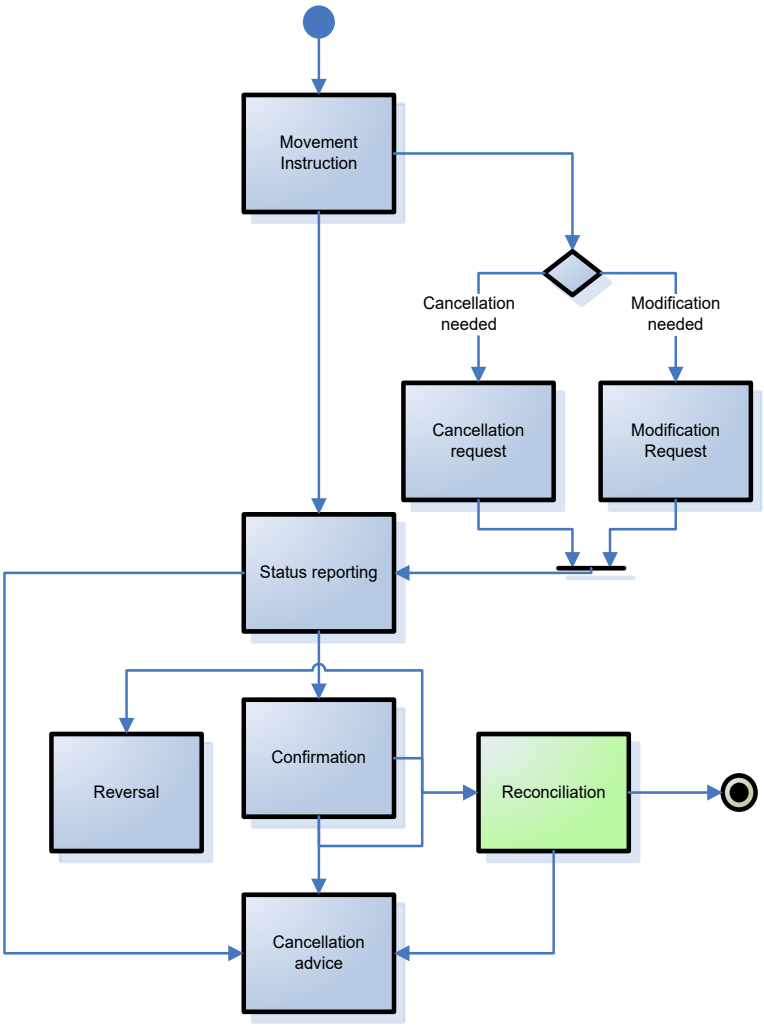

Item	Description
Definition	The process of reporting, for a given period of time, previously sent intra-balance movement instructions with a status of settled.
Trigger	The process is triggered by a system event (e.g. end-of-day or end of night-time cycle…).
Pre-conditions	Static Data configuration satisfying the requirement for reporting of settled intra-balance movement instructions.
Post-conditions	A valid Intra-Balance Movement Posting report is generated.
Role	Executing/Servicing Party for the report / Account owner (Receiving Party) of instructions reported by the report.

4.2 High-level process diagrams

The following graphs describe the high-level sequence of the processes described above. The main processes that cover the Intra-balance Management process are highlighted in green, the surrounding processes, included for completeness, in blue.

Modification Request
Cancellation Request
Status reporting
Reversal
Reconciliation

Movement Instruction
Cancellation needed
Modification needed
Cancellation request
Modification Request
Status reporting
Reversal
Confirmation
Reconciliation
Cancellation advice

5 Description of BusinessActivities

This section presents the different BusinessActivities within each BusinessProcess. The BusinessActivities of a process are described with activity diagrams.

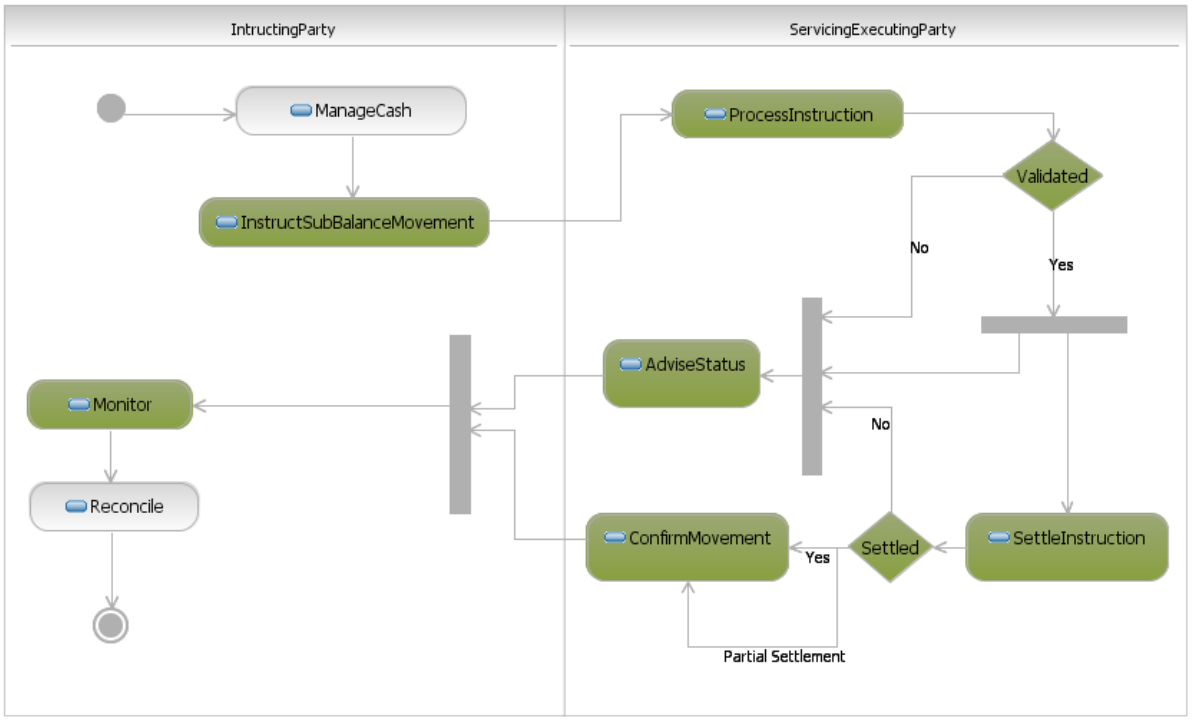

Legend

Symbol	Name	Definition
	Start Point	Shows where the lifecycle of the business process commences.
	End Point	Shows where the lifecycle of the business process may ends.
	Lozenge (or diamond)	Indicates that a choice between several actions can be made.
	Bar	Indicates that several actions are initiated in parallel.

5.1 Intra-Balance Movement Process

5.1.1 External Scenario

It covers the standard scenario where the process begins when an instructing party initiates a movement as opposed to the internal scenario where the servicing/executing party initiates a movement in response to settlement activity and must subsequently inform a third party of activity on sub balances within their holdings.

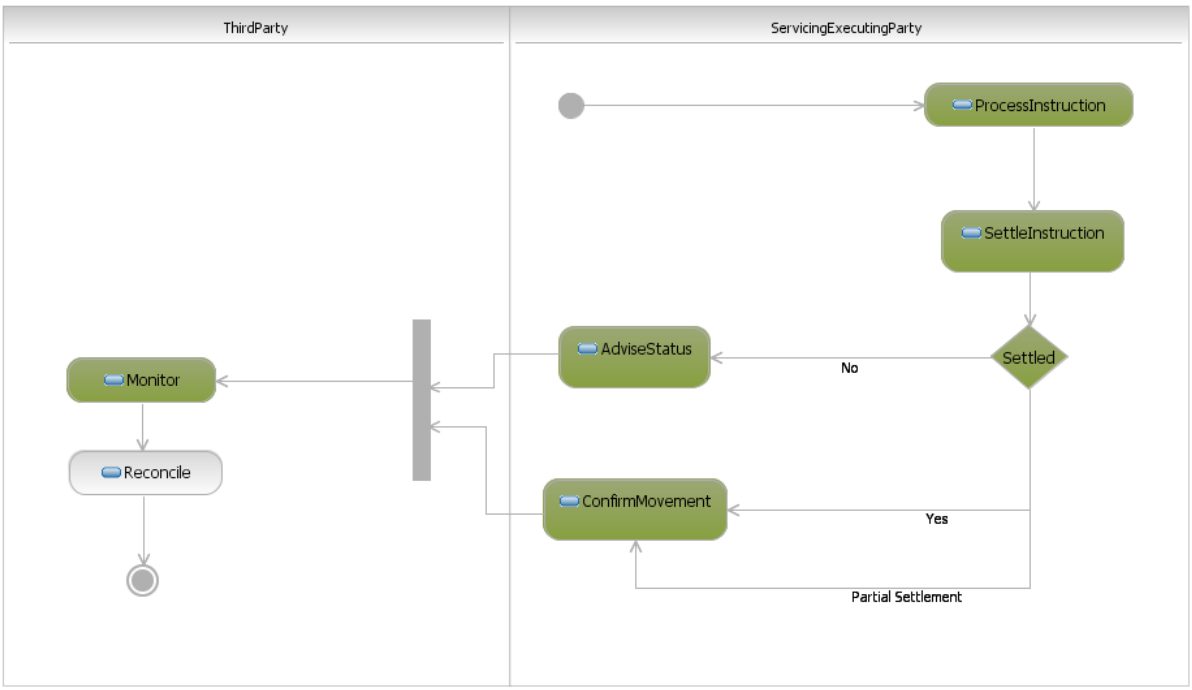

Step	Description	Initiator
Manage Liquidity	External process resulting in need for liquidity movements within sub balances.	Instructing Party
Instruct SubBalance Movement	Actual instruction for liquidity reservation.	Instructing Party
Process Instruction	Validation of the movement request.	Servicing/Executing Party
Validate	• If YES, i.e., the request is valid, go to the Settle Instruction choice. • If NO, then Advice Status.	Servicing/Executing Party
Settle Instruction	Attempt to credit and debit cash account sub balances as instructed.	Servicing/Executing Party
Settled	• If YES, that is the request is settled then go to the Confirm Movement choice. • If NO, then Advice Status.	Servicing/Executing Party

Step	Description	Initiator
Confirm Movement	Routes confirmation report to communication layer	Servicing/Executing Party
Advice Status	Routes status report to communication layer.	Servicing/Executing Party
Monitor	Check for incoming communications associated with original instruction.	Instructing Party
Reconcile	External process reconciling impact of current status of original instruction.	Instructing Party

5.1.2 Internal Scenario

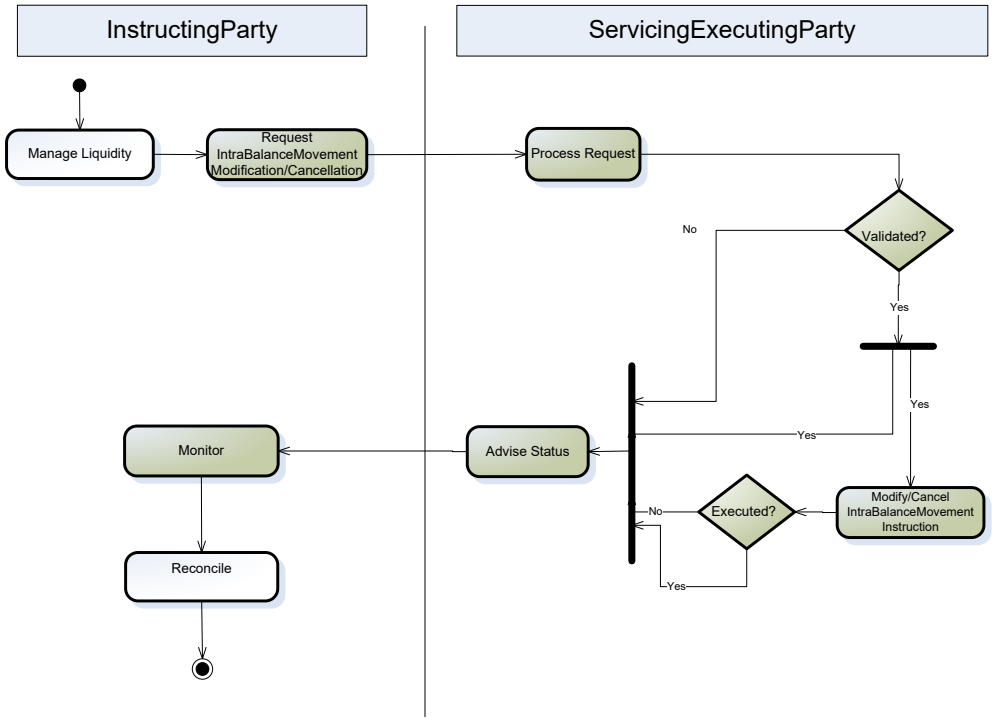

It covers the internal scenario where the servicing/executing party initiates a movement in response to settlement activity and must subsequently inform a third party of activity on sub balances within their holdings.

Step	Description	Initiator
Process Instruction	Process Instruction: Validation of the movement request.	Servicing/Executing Party
Settle Instruction	Attempt to credit and debit cash account sub balances as instructed.	Servicing/Executing Party
Settled	• Settled If YES, i.e., the request is settled then go to the Confirm Movement choice. • If NO, then Advice Status.	Servicing/Executing Party

Step	Description	Initiator
Process Instruction	Validation of the movement request.	Servicing/Executing Party
Confirm Movement	Routes confirmation report to communication layer	Servicing/Executing Party
Advice Status	Routes status report to communication layer.	Servicing/Executing Party
Monitor	Check for incoming communications associated with original instruction.	Third Party
Reconcile	External process reconciling impact of current status of original instruction.	Third Party

5.2 Intra-Balance Movement Modification/Cancellation Process

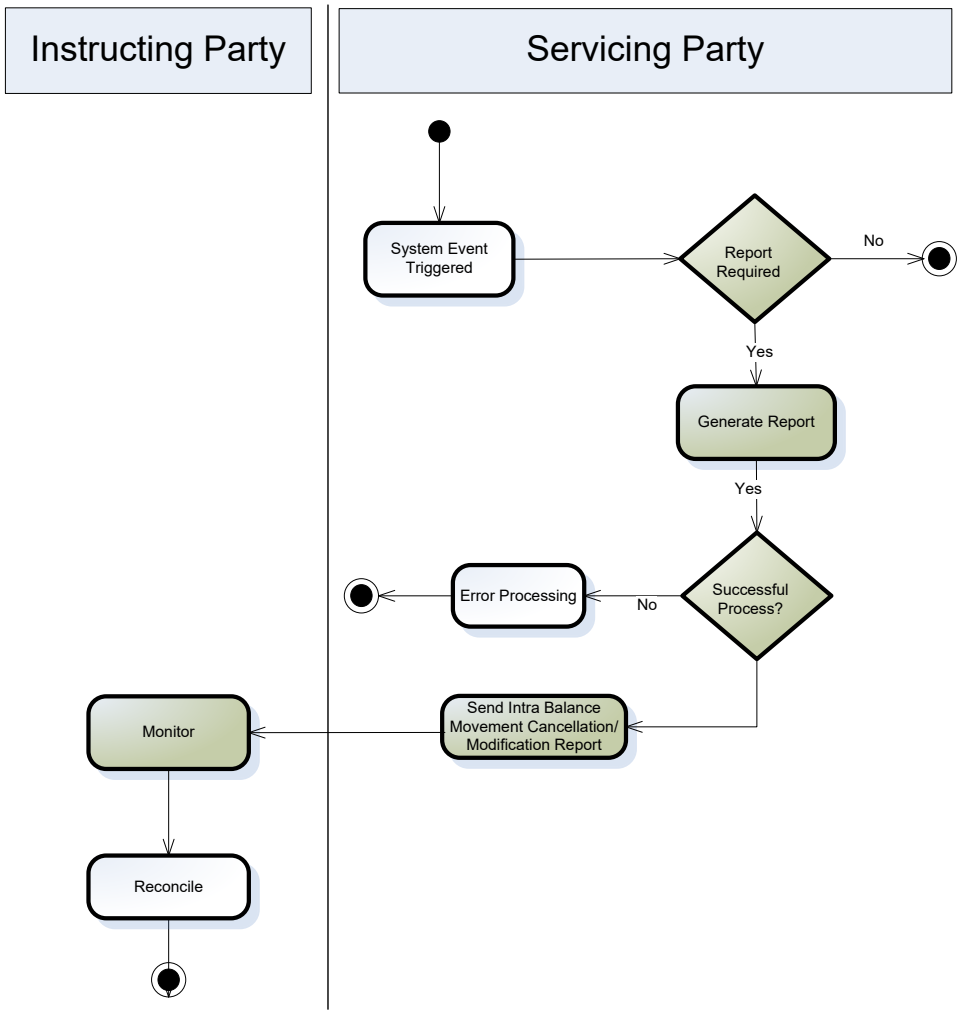

Step	Description	Initiator
Manage Liquidity	External process resulting in need for liquidity movements within sub balances.	Instructing Party

Step	Description	Initiator
Request Intra-Balance Movement Modification/Cancellation	Actual request for liquidity reservation (intra-balance movement) modification or cancellation.	Instructing Party
Process Instruction	Validation of the movement request.	Servicing/Executing Party
Validate	• Validated If YES, i.e., the request is valid, go to the Advice Status choice and to the Modify/Cancel Intra-Balance Movement Request choice. • If NO, then Advice Status.	Servicing/Executing Party
Modify/Cancel Intra-Balance Movement Instruction	Attempt to modify/cancel a specific liquidity reservation instruction	Servicing/Executing Party
Executed	• Executed If YES, i.e., the request is successfully executed then respond with positive Advice Status choice. • If NO, then Advice Status.	Servicing/Executing Party
Advice Status	Routes status report to communication layer.	Servicing/Executing Party
Monitor	Check for incoming communications associated with original instruction.	Instructing Party
Reconcile	External process reconciling impact of current status of original instruction.	Instructing Party

5.3 Intra-Balance Movement Modification/Cancellation Query/Report Process

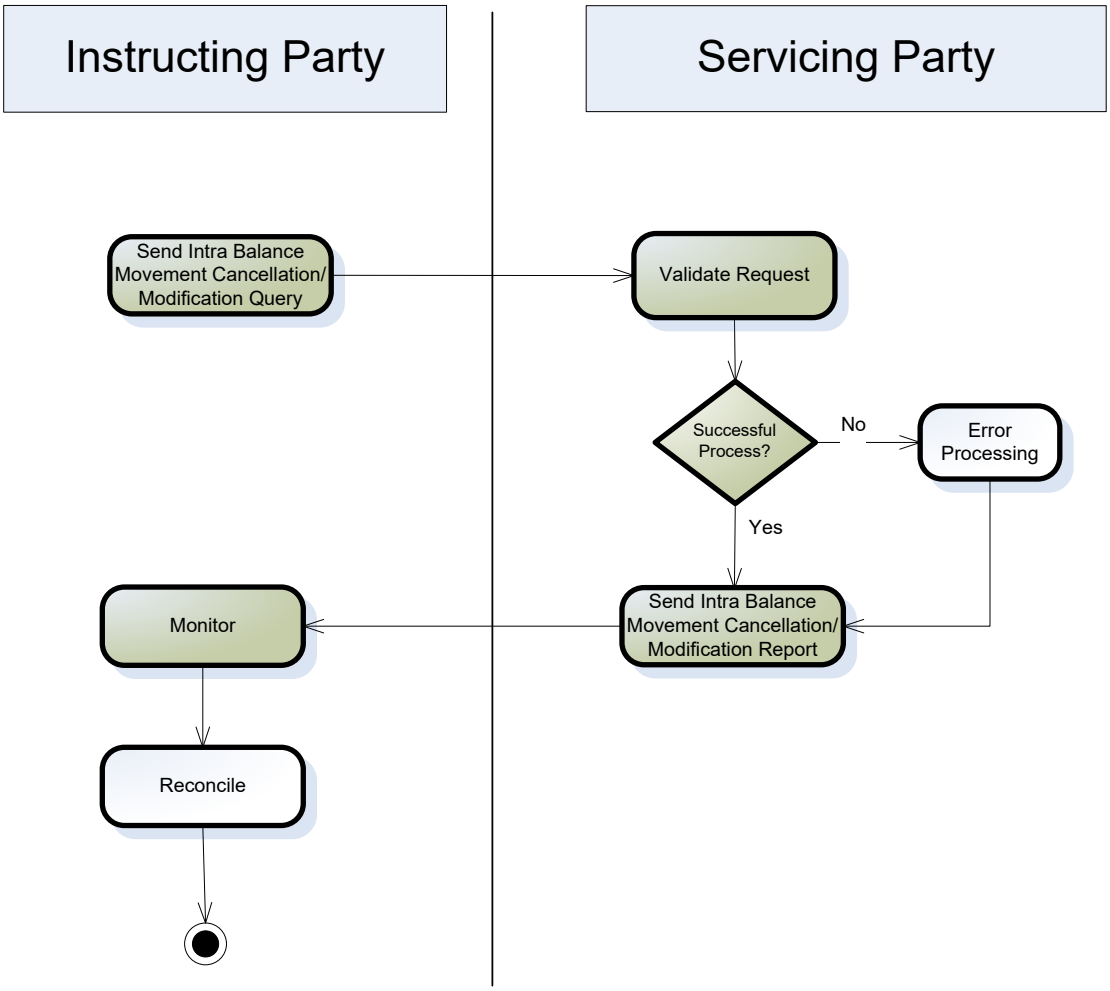

5.3.1 Push Mode

Step	Description	Initiator
System Event Triggered	External process resulting in need for liquidity movements reporting.	Servicing/Executing Party Instructing Party
Report Required	Verification that reporting required for parties under current conditions. • If YES, then go to the Generate Report Process. • If NO, then end of activity.	Servicing/Executing Party

Step	Description	Initiator
Generate Report	Build a report for Intra Balance Movement Cancellation/Modification Instructions satisfying a previously selected criterion.	Servicing/Executing Party
Successful Process	• If YES, the report is properly generated then go to the Send Intra Balance Movement Cancellation/Modification Report process. • If NO; then Error Processing to advise the Instructing Party.	Servicing/Executing Party
Send Intra Balance Movement Cancellation/Modification Report	Route Report to Instructing Party under a selected criterion.	Servicing/Executing Party
Error Processing	Adds operational errors to response before routing to Instructing Party	Servicing/Executing Party
Monitor	Monitor: Check for incoming communications (Intra Balance Movement Cancellation/Modification Report).	Instructing Party
Reconcile	Reconcile: External process reconciling impact of current status of original instruction.	Instructing Party

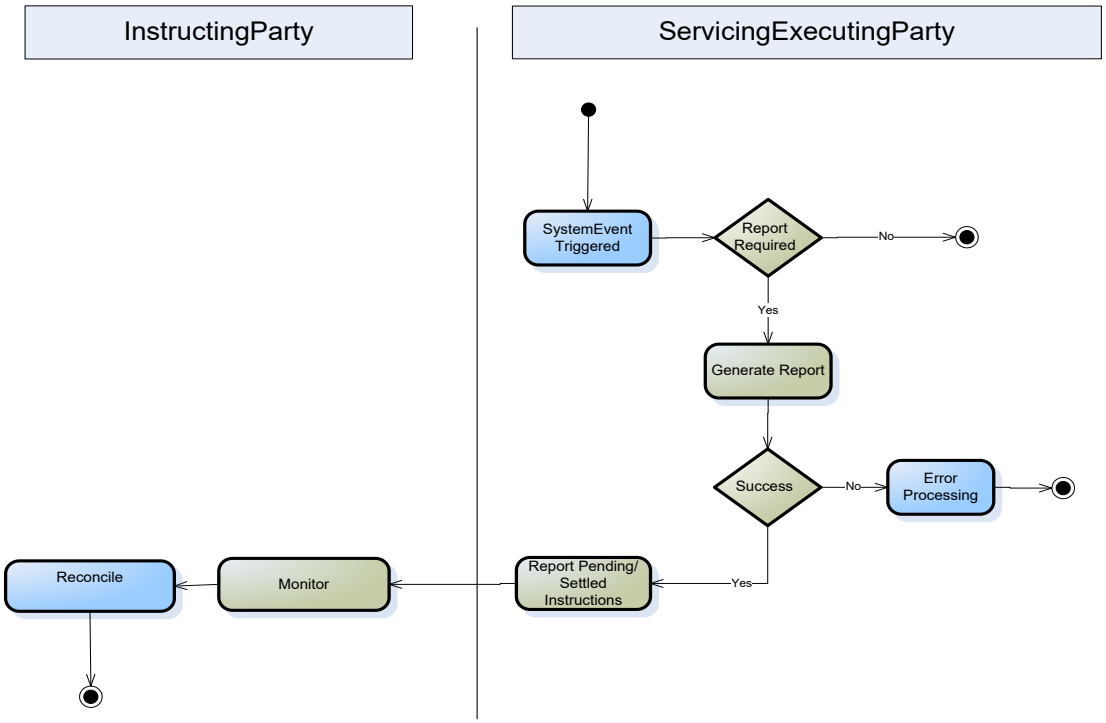

5.3.2 Pull Mode

Step	Description	Initiator
Send Intra-Balance Movement Cancellation/Modification Query	Request Query to Servicing Party under a selected criterion.	Instructing Party
Validate Request	Technical and business validation of the request before further processing or not.	Servicing/Executing Party
Generate Report	Build a report for Intra Balance Movement Cancellation/Modification Instructions satisfying a previously selected criterion.	Servicing/Executing Party
Successful Process	• If YES, the report is properly generated then go to the Send Intra Balance Movement Cancellation/Modification Report process. • If NO; then Error Processing to advise the Instructing Party.	Servicing/Executing Party

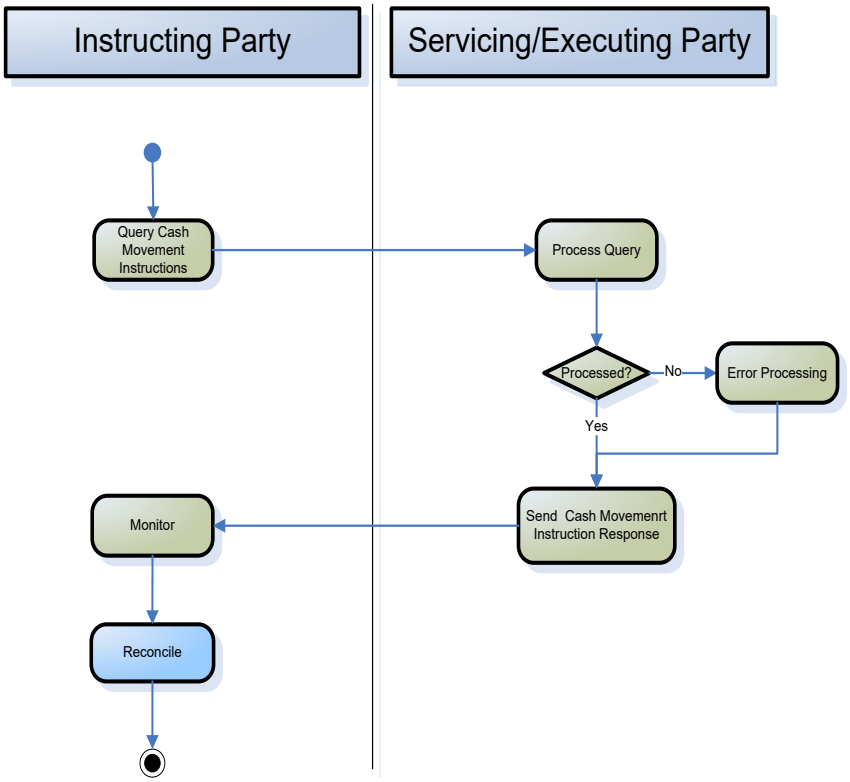

Step	Description	Initiator
Send Intra Balance Movement Cancellation/Modification Report	Route Report to Instructing Party under a selected criterion.	Servicing/Executing Party
Error Processing	Adds operational errors to response before routing to Instructing Party	Servicing/Executing Party
Monitor	Monitor: Check for incoming communications (Intra Balance Movement Cancellation/Modification Report).	Instructing Party
Reconcile	Reconcile: External process reconciling impact of current status of original instruction.	Instructing Party

5.4 Intra-Balance Movement Pending/Posting Report Process

Step	Description	Initiator
System Event Triggered	External process resulting in need for liquidity movements reporting.	Servicing/Executing Party Instructing Party
Report Required	Verification that reporting required for parties under current conditions. • If YES, then go to the Generate Report Process. • If NO, then end of activity.	Servicing/Executing Party
Generate Report	System process that creates a report from previously received intra-balance instructions satisfying reporting criteria (i.e., pending or settled).	Servicing/Executing Party
Successful Process	• If YES, the report is properly generated then go to the Send Intra Balance Movement Cancellation/Modification Report process. • If NO; then Error Processing to advise the Instructing Party.	Servicing/Executing Party
Report Pending/Settled Intra-Balance Movement Instruction	Route Report to Instructing Party under a selected criterion.	Servicing/Executing Party
Error Processing	Adds operational errors to response before routing to Instructing Party	Servicing/Executing Party
Monitor	Monitor: Check for incoming communications (Intra Balance Movement Cancellation/Modification Report).	Instructing Party
Reconcile	Reconcile: External process reconciling impact of current status of original instruction.	Instructing Party

5.5 Intra-Balance Movement Query/Response Process

Step	Description	Initiator
Query	Intra-Balance Movement Query to Servicing/Executing Party	Instructing Party
Process Query	Technical and business validation of the query before further processing or not.	Servicing/Executing Party
Successful Process	• If YES, the report is properly generated then go to the Send Intra Balance Movement Report process. • If NO; then Error Processing to advise the Instructing Party.	Servicing/Executing Party
Send Intra Balance Movement Report	Route Report to Instructing Party under a selected criterion.	Servicing/Executing Party
Error Processing	Adds operational errors to response before routing to Instructing Party	Servicing/Executing Party
Monitor	Monitor: Check for incoming communications associated with original instruction	Instructing Party
Reconcile	Reconcile: External process reconciling impact of current status of original instruction.	Instructing Party

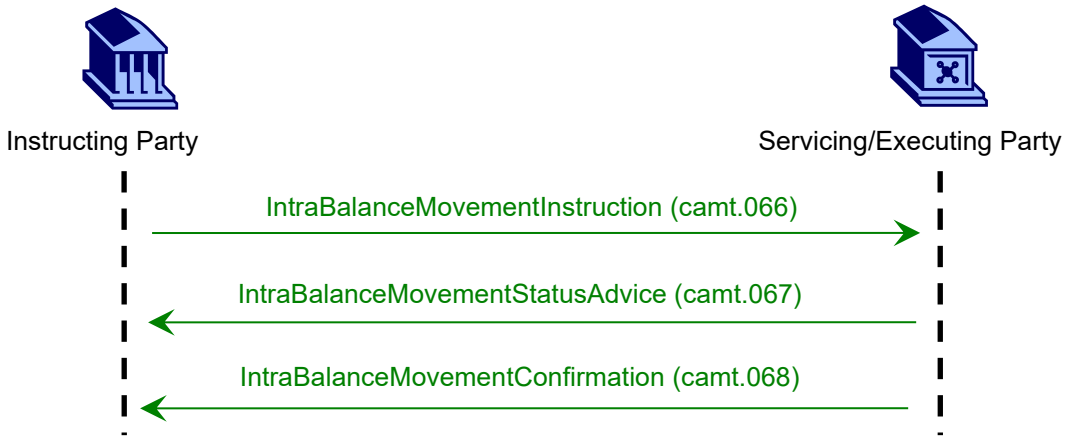

6 BusinessTransactions

This section describes the message flows based on the activity diagrams documented above. It shows the typical exchanges of information in the context of a BusinessTransaction.

6.1 Creation Process

6.1.1 In external scenario

It applies when the cash settlement restriction sent by the Instructing party is processed and confirmed by the Servicing/Executing party.

IntraBalance Movement Instruction

The Instructing Party sends the instruction to the Servicing/Executing Party to allocate money from a specific cash account. This instruction contains all the information needed for the movement of cash between balances.

IntraBalance Movement Status Advice

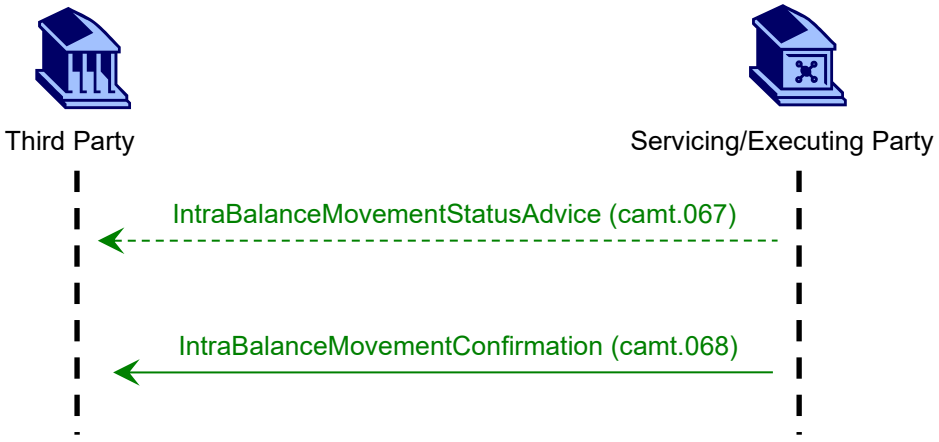

The Servicing/Executing Party informs the Instructing Party about the lifecycle of its instruction with its actual status.

IntraBalance Movement Confirmation

The Servicing/Executing Party informs the Instructing Party that the Intra-balance movement has been successfully processed either in full mode or in partials. The Servicing/Executing Party presents to the Instructing Party the unique reference number assigned that identifies the restriction.

6.1.2 In internal scenario

It applies when the Servicing/Executing party initiates a cash settlement restriction in response to a settlement activity (i.e. an internal movement of liquidity) and informs a third party that it has been processed.

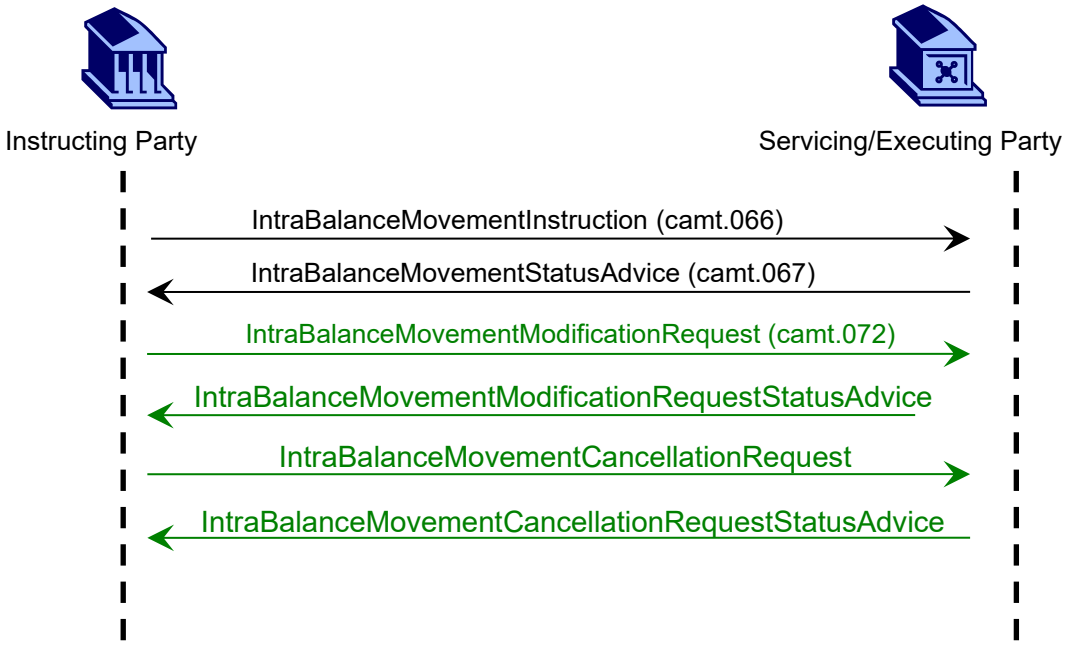

IntraBalance Movement Status Advice

The Servicing/Executing Party triggered by an internal movement of liquidity informs the Instructing Party creation of an Intra-balance movement.

IntraBalance Movement Confirmation

The Servicing/Executing Party informs the Instructing Party that the Intra-balance movement has been successfully processed either in full mode or in partials. The Servicing/Executing Party presents to the Instructing Party the unique reference number assigned that identifies the restriction.

6.2 Modification and Cancellation Process

IntraBalance Movement Instruction

The Instructing Party sends the instruction to the Servicing/Executing Party to allocate money from a specific cash account. This instruction contains all the information needed for the movement of cash between balances.

IntraBalance Movement Status Advice

The Servicing/Executing Party informs the Instructing Party about the lifecycle of its instruction with its actual status.

IntraBalance Movement Modification Request

The instructing Party requests the modification of a processing indicator or other information of the intra-balance movement instruction previously sent.

IntraBalance Movement Modification Request Status Advice

The Servicing/Executing Party informs the Instructing Party about the status of the intra-balance movement modification request previously sent.

IntraBalance Movement Cancellation Request

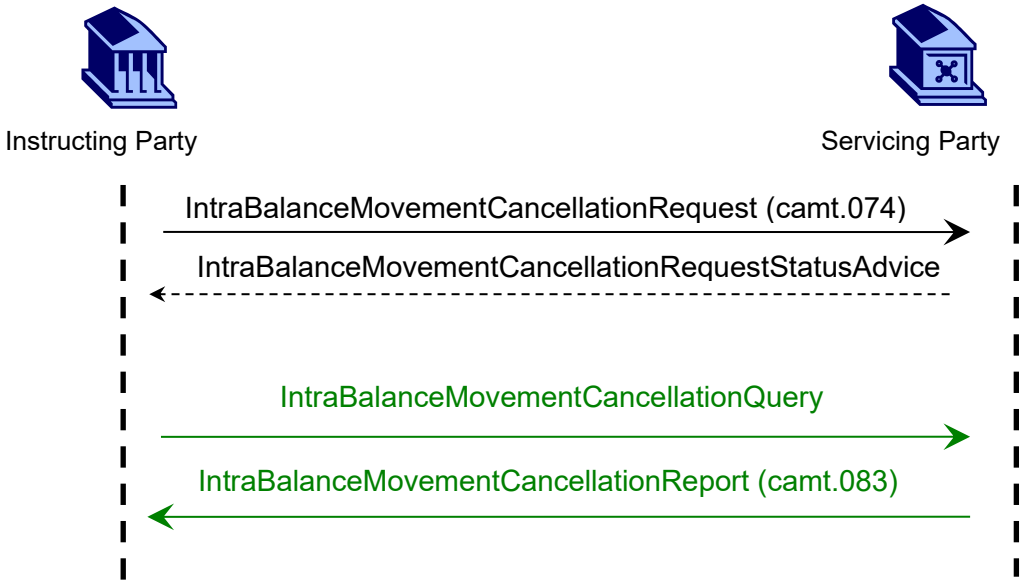

The instructing Party requests the cancellation of the intra-balance movement instruction previously sent.

IntraBalance Movement Cancellation Request Status Advice

The Servicing/Executing Party informs the Instructing Party about the status of the intra-balance movement cancellation request previously sent.

6.3 Intra-Balance Movement Modification/Cancellation Query and Report Process

6.3.1 Requesting an Intra Balance Cancellation Query

IntraBalance Movement Cancellation Request

The instructing Party requests the cancellation of the intra-balance movement instruction previously sent.

IntraBalance Movement Cancellation Request Status Advice

The Servicing Party informs the Instructing Party about the status of the intra-balance movement cancellation request previously sent.

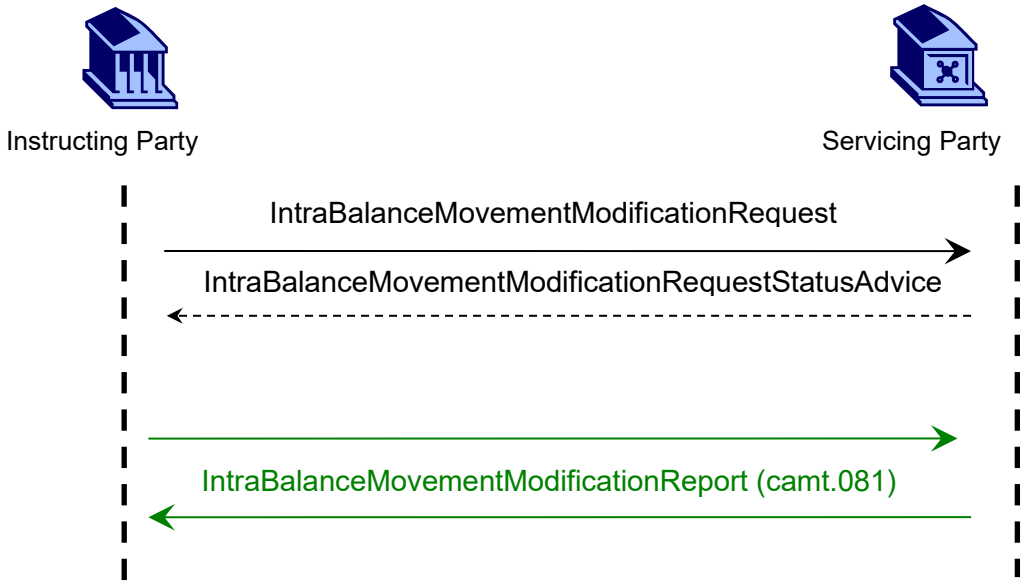

IntraBalance Movement Cancellation Query

The instructing Party requests a query to retrieve all the Intra-balance Movement Cancellation Requests, along with their current status, that satisfy the defined selection criteria.

IntraBalance Movement Cancellation Report

The Servicing party sends to the Instructing party the response of the query with the full details of the Intra-Balance Movement Cancellation Instruction/s that fulfilled the selection criteria.

6.3.2 Requesting an Intra Balance Modification Query

IntraBalance Movement Modification Request

The instructing Party requests the modification of a processing indicator or other information of an intra-balance movement instruction previously sent.

IntraBalance Movement Modification Request Status Advice

The Servicing/Executing Party informs the Instructing Party about the status of the intra-balance movement modification request previously sent.

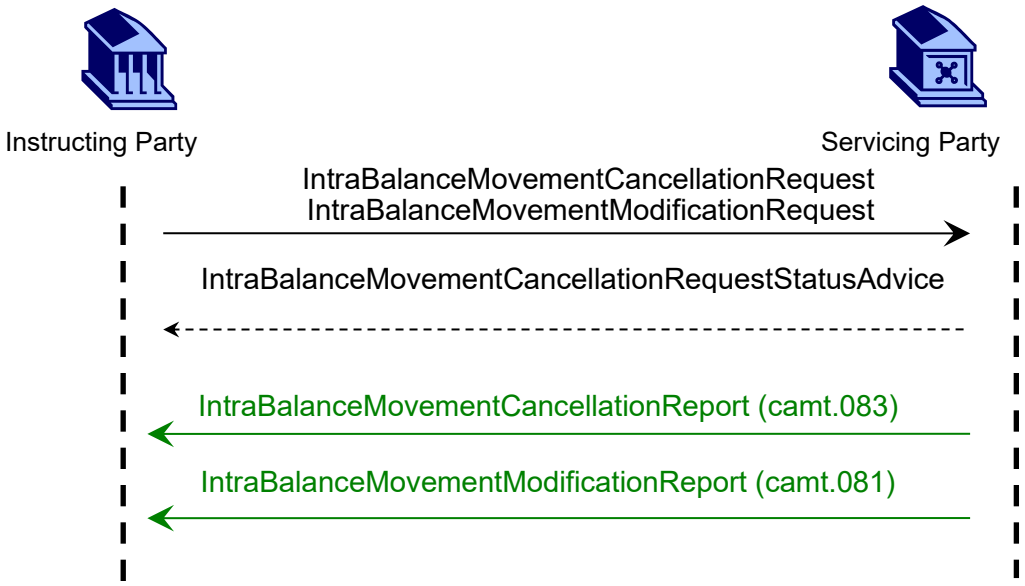

IntraBalance Movement Modification Query

The instructing Party requests a query to retrieve all the Intra-balance Movement Modification Requests, along with their current status, that satisfy the defined selection criteria.

IntraBalance Movement Modification Report

The Servicing party sends to the Instructing party the response of the query with the full details of the Intra-Balance Movement Modification Instruction/s that fulfilled the selection criteria.

6.3.3 Producing an Intra Balance Modification/Cancellation Report at a business event.

IntraBalance Movement Cancellation Request

The instructing Party requests the cancellation of the intra-balance movement instruction previously sent.

IntraBalance Movement Modification Request

The instructing Party requests the modification of a processing indicator or other information of an intra-balance movement instruction previously sent.

IntraBalance Movement Cancellation Request Status Advice

The Servicing Party informs the Instructing Party about the status of the intra-balance movement cancellation request previously sent.

IntraBalance Movement Modification Request Status Advice

The Servicing/Executing Party informs the Instructing Party about the status of the intra-balance movement modification request previously sent.

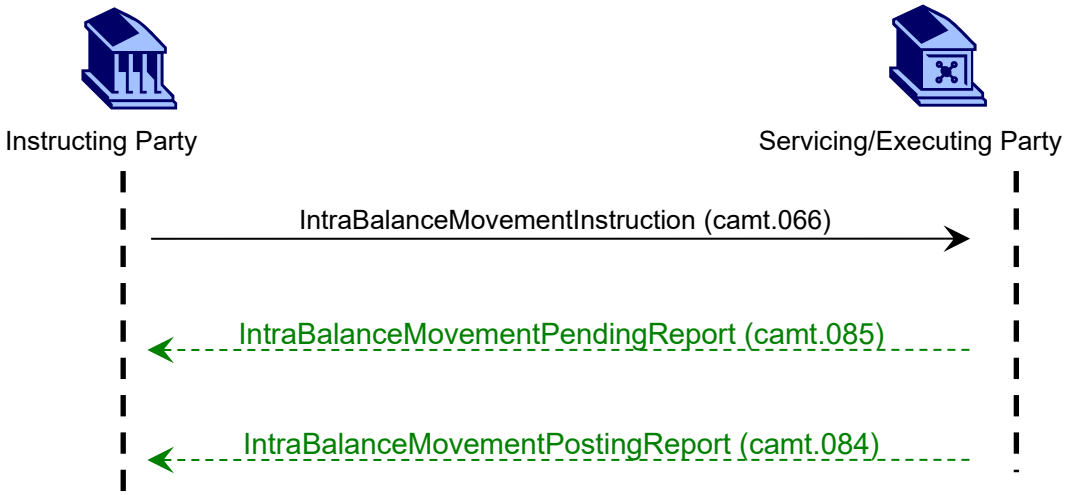

IntraBalance Movement Cancellation Report

The Servicing party sends to the Instructing party a report with the details of its Intra-Balance Movement Cancellation Instruction/s at a moment in time.

IntraBalance Movement Modification Report

The Servicing party sends to the Instructing party a report with the details of its Intra-Balance Movement Modification Instruction/s at a moment in time.

6.4 Intra-Balance Movement Pending/Posting Report Process

IntraBalance Movement Instruction

The Instructing Party sends the instruction to the Servicing/Executing Party to allocate money from a specific cash account. This instruction contains all the information needed for the movement of cash between balances.

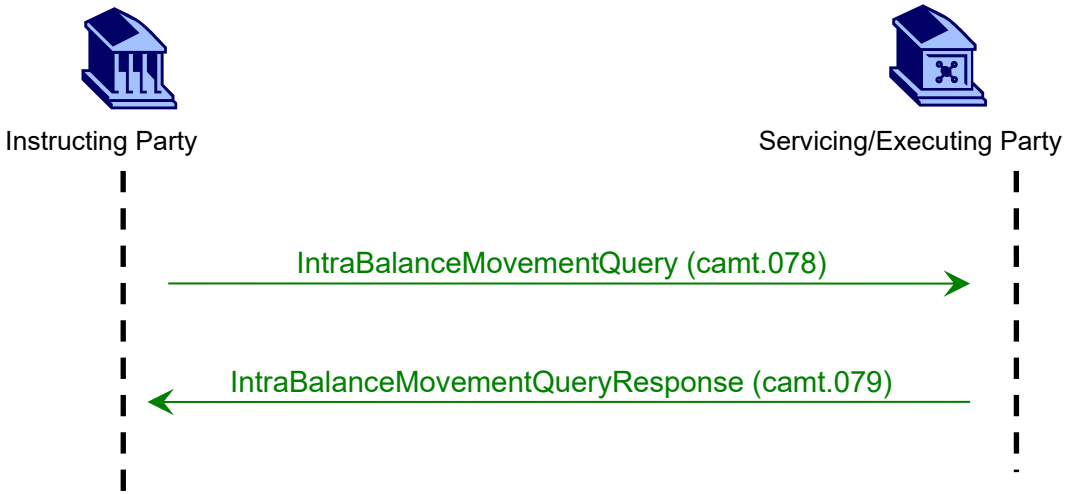

IntraBalance Movement Pending Report

The Servicing/Executing Party sends a report to the Instructing Party with the information of the intra-balance movement instructions previously sent by the Instructing Party, which have a status of pending.

IntraBalance Movement Posting Report

The Servicing/Executing Party sends a report to the Instructing Party with the information of the intra-balance movement instructions previously sent by the Instructing Party, which have been settled.

6.5 Intra-Balance Movement Query/Response Process

IntraBalance Movement Query

The instructing Party requests a query to retrieve all the Intra-balance Movement Instructions previously sent, along with their current status, that satisfy the defined selection criteria.

IntraBalance Movement Query Response

The Servicing/Executing Party sends to the Instructing party the response of the query with the full details of the Intra-Balance Movement Instruction/s that fulfilled the selection criteria.

7 Examples

This section describes business examples of the use of the various MessageDefinitions for Intra-balance Movement Instruction, Intra-balance Movement Status Advice, Intra-balance Movement Confirmation, Intra-balance Movement Modification Request, Intra-balance Movement Modification Request Status Advice, Intra-balance Movement Cancellation Request, Intra-balance Movement Cancellation Request Status Advice, Intra-balance Movement Query, Intra-balance Movement Query Response, Intra-balance Movement Modification Query, Intra-balance Movement Modification Report, Intra-balance Movement Cancellation Query, Intra-balance Movement Cancellation Report, Intra-balance Movement Posting Report and Intra-balance Movement Pending Report. Each example starts with a description of the example scenario followed by the actual Message Instance. All XML instances are embedded in the BAH, but the XML message instance provided below do only show the content of the pure business message.

7.1 Intra-balance Movement Instruction - camt.066.001

Description

In this example, Party A “PRTYABICXXX” has requested, using a transaction id ‘REF0123’, the blocking of 50000 EUR, within a pool with reference ‘POOL1234’, with a normal priority for the restriction type ‘BLKA’, on the 9th of January 2015 within its account ‘9000000123’.

7.3 Intra-balance Movement Confirmation - camt.068.001

Description

In this example, the confirmation of the full settlement of the blocking set-up by Party A (PBPTYBICXXX) is presented. Party A requested the blocking of 50000 EUR, using the restriction type 'BLKA', within its cash account '9000000123'. T2S (in the case of this example) confirms the blocking and assigns it the reference T222.

7.4 Intra-balance Movement Modification Request - camt.072.001

Description

In this example Party A (PRTYABICXXX) has requested the amendment of the priority to ‘High’, on an existing cash Settlement Restriction with an account owner transaction id, ‘REF0123’. The original cash Settlement Restriction requested the ‘Normal’ priority blocking of 50000 EUR for the sub balance ‘BLKA’, of the cash account, ‘1000000123’, settling on the 9th of January 2015.

7.6 Intra-balance Movement Cancellation Request - camt.074.001

Description

In this example Party A (PBPTYBICXXX), has requested the cancellation of the Intra-balance movement with an account owner transaction id, ‘REF0123’. The Market Infrastructure transaction Identification of the 'to be' cancelled Intra-balance movement is ‘T1390’ and refers to a Cash Blocking Settlement Restriction for 50000 EUR, using the restriction type “BLKA” sent by the Party A within its account ‘1000000123’ and Intended Settlement Date on the 9th of January 2015.

In this example, Party A specifies both references (AcctOwnrTxId and MktInfrstrctrTxId) to refer the Settlement Restriction willing to cancel.

7.7 Intra-balance Movement Cancellation Request Status Advice - camt.075.001

Description

This example refers to the usage of a status advice message, sent by T2S, when the Cancellation Instruction of an Intra-balance movement is valid. A Cancellation Instruction of an Intra-balance movement is valid and accepted by T2S if it passes the business validation process.

7.9 Intra-balance Movement Query Response - camt.079.001

Description

In this example an Intra-Balance Movement Query Response containing 4 instructions matching the query criteria corresponding to query reference ‘ID0Q0F001122’ is depicted. This message is sent as a response to an Intra-Balance Movement Query requesting all movements where the dedicated cash account is ‘9000000123’ and the Restriction Reference is ‘567459’.
